NATIONAL UNIVERSITY

BANGLADESH

Syllabus

Department of Philosophy

Four-Year BA (Honours) Program

Effective from the Session: 2024-2025

Mission:

To promote "Progress for Everyone" by fostering transformative education, conducting pioneering research, and encouraging meaningful collaboration with individuals, communities, and partners both in Bangladesh and around the world.

Vision:

We expect that the hundredth anniversary of the National University, our commitment to "Progress for Everyone" will be evident in all areas of our operations and stakeholder engagements. We leverage our core strength in education, research, and community engagement to address pressing global issues and foster sustainable development. By 2042, National University aims to strengthen its positions as Bangladesh's top academic institution and rank among the world's leading universities. Our focus will be on expanding expertise building strategic partnerships, and increasing our global influence. Our services will be measured by the achievements of the individuals and communities we serve.

Title of the Academic Program: Bachelor of Arts (Honors) Philosophy

Program Educational Objectives (PEOs):

PEO 1: To produce graduates with a solid foundation in philosophical thought and traditions.
PEO 2: To enable graduates to apply philosophical analysis to moral, social, political, and metaphysical problems.
PEO 3: To foster lifelong learning, intellectual inquiry, and scholarly research in philosophy and related fields.
PEO 4: To prepare students for careers in education, civil service, journalism, law, and other professions requiring critical and ethical reasoning.

Mapping between Mission and Program Educational Objectives (PEOs)

Program Learning Outcomes (PLOs):

Upon completion of the Philosophy program, students will be able to:
PLO 1: Demonstrate understanding of key philosophical theories, traditions, and arguments.
PLO 2: Analyze complex philosophical texts and arguments logically and coherently.
PLO 3: Apply philosophical reasoning to contemporary moral and social issues.
PLO 4: Communicate philosophical ideas clearly in both oral and written forms.
PLO 5: Demonstrate ethical awareness and intellectual honesty in reasoning and debate.
PLO 6: Engage in independent philosophical research and critical self-reflection.

Course Title :	**Problems of Philosophy**		

Course description:

Generally, philosophy means love of wisdom. It arises out of wonder, curiosity and the desire to know and understand our lives as well as the universe. So, Philosophy is a study that seeks to understand the mysteries of existence and reality. The areas of philosophy can be divided into three basic branches i.e., epistemology, Metaphysics and axiology. This course is designed to cover the fundamental problems of these three basic areas of philosophy.

Creation and evolution, theories of knowledge, theories of truth, theories of reality, freedom of will, problem of God, problem of values etc. are the key components of this course.

Objectives of the Course:

1. To acquire knowledge about the fundamental problems or questions asked by philosophers about life and the world;
2. To know the ways in which they might begin to answer these questions,
3. To recognize the different branches of philosophy which originate from these basic questions,
4. To develop the analytical thinking for a deeper understanding of difficult or abstract concepts, new and interesting interpretations of ideas, and rich conversations with others;
5. To develop ability to write clearly, read closely with a critical eye.

Course Learning Outcomes (CLOs):

CLO 1: Basic Understanding:

Learners will be able to identify and explain the central problems of philosophy such as knowledge, reality, mind-body problem, free will, existence of God, and personal identity.

CLO 2: Analytical Thinking

Learners will be able to analyze philosophical arguments critically and distinguish between sound reasoning and fallacies.

CLO 3: Comparative Perspectives

Learners will be able to compare and contrast different philosophical perspectives (e.g., Rationalism vs. Empiricism, Dualism vs. Materialism) on core philosophical issues.

CLO 4: Application & Communication

Learners will be able to apply philosophical reasoning to real-life ethical, metaphysical, and epistemological questions and communicate their views effectively in both written and oral form.

Course Contents

Topics	**Teaching-Learning Strategies**	**CLOs**
Group A By the end of the course, students should be able to: 1. **Understand Key Philosophical Questions**: Articulate fundamental questions, such as: What is knowledge? Do we have free will? What is the good life? Recognize how these questions appear across historical and cultural contexts (e.g., Plato's *Republic*, Confucian ethics). 2. **Analyze Philosophical Arguments**: Identify the structure of arguments (premises, conclusions) and evaluate their validity and soundness. 3. **Develop Communication and Reasoning Skills**: Construct clear, well-reasoned arguments in written and oral form, supported by evidence from philosophical texts. 4. **Cultivate Reflective Thinking**: Reflect on personal beliefs about reality, morality, and knowledge, questioning assumptions and biases. One. Introducing Philosophy: i. Origin, definition, nature, scope, and value of philosophy; ii. Methods of philosophy: authoritarianism, dialectic, criticism, and	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	**CLO1** **CLO2** **CLO3**

analysis; iii. Philosophy's Relationship with Other Disciplines a. Philosophy **and Science** **Description**: Explores the philosophy of science, which investigates the nature of scientific knowledge, methods, and truth. Relation of philosophy to science, religion and common sense. **b.** Metaphysics questions the nature of reality studied by physics (e.g., space-time, causality). **c. Philosophy and Psychology** **Description**: Investigates the philosophy of mind and its overlap with psychology, focusing on consciousness, free will, and the mind-body problem. Explores how philosophical theories (e.g., dualism, functionalism) inform psychological research on cognition and behavior. **Examples of Intersection**: Philosophy of mind informs cognitive science (e.g., theories of consciousness). Ethical questions arise in psychological research (e.g., informed consent). **d. Philosophy and Politics** **Description**: Focuses on political philosophy and its relationship with political science and governance. Topics include justice, authority, liberty, and the social contract, with thinkers like Plato, Hobbes, and Rawls. **Examples of Intersection**: Political philosophy informs policy debates (e.g., Rawls' theory of justice). Ethical principles guide political decision-making (e.g., human rights). **e. Philosophy and Religion** **Description**: Explores the philosophy of religion, examining the existence of God, the nature of faith, and the problem of evil. Investigate how philosophical inquiry critiques and supports religious doctrines. **Examples of Intersection**: Metaphysics engages with theological concepts (e.g., divine omnipotence). Ethics informs religious moral frameworks (e.g., divine command theory).		

Two. Epistemology or Theory of knowledge: Defines epistemology as the study of knowledge and justified belief and explores the tripartite definition (knowledge as justified true belief, or JTB). Discusses why epistemology matters in everyday life (e.g., evaluating news, forming beliefs). **Key Concepts**: Knowledge vs. belief Justification, truth, and the JTB model Epistemic responsibility (e.g., avoiding misinformation) Sources of Knowledge i. Examines how we acquire knowledge, focusing on perception, reason, testimony, and memory. ii. Introduces authoritarianism, rationalism (knowledge through reason) vs. empiricism (knowledge through experience) debates, using thinkers like Descartes (rationalist) and Locke (empiricist). Nature of knowledge. i. Rationalism, ii. Realism and Idealism; Theories of the extent of knowledge: Agnosticism and Skepticism; Theories of the validity of knowledge: correspondence, coherence, and pragmatic theories of truth.	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	**CLO2, CLO3**

<u>Group: B</u> **Metaphysics or Ontology** **One. Nature of reality:** i. Materialism: Carvaka materialism, mechanical materialism and dialectical materialism; ii. idealism : Indian Idealism, subjective idealism of Berkeley, objective idealism of Plato and Hegel; iii. Number of reality: Monism (Shankara's advaita, Spinoza's substance), Dualism (Shamkhya and Descartes'dualism) and Pluralism; iv. Theories of the freedom of the will: determinism, indeterminism, self-determinism.	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	**CLO2, CLO3**

Two. Theories of reality: idealism and materialism, monism, dualism, and pluralism. Problem of the mind-body relation. The problem of value, types of value. Freedom of will and immortality of the soul. **Three. Theories of the Origin of Life:** i. Creation and evolution; ii. Theories of special creation; iii. Theories of evolution: mechanical, teleological, creative and emergent; Eastern views on creation and evolution. Philosophy of Mind • Theories of mind-body relationship: interactionism, parallelism, epiphenomenalism and occasionalism.	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	**CLO2, CLO3**

Course Title :	History of Western Philosophy: Ancient and Medieval		

Course descriptions

The pro-Socratic philosophers were the founding forefathers of western philosophy. They raised many perial about the nature and origin of the world Socrates gave philosophy a new direction based on rationalistic approach Plato tined wcntic Ine of thought and also added his own theories to philosophy and ancient philosophy ends with the systematic philosophy of Aristotle.

Medieval philosophy is not really a continuation of ancient player a Sport fices it Medieval philosophy prioritizes pr a philosophy based on on religion Social, historical and religious backgrounds of the Middle age are wone of the components of Bis course. Besides, philosophical thoughts and seas of some mayor philosophers of this period have come under the purview of discussion in this.

Course Objectives:

Objectives of the Course the specific objectives of this course are:
1. To know about some major ancient Greek philosophers
2. To develop insights into the interpretative power of the ancient philosophical texts.
3. To understand how philosophy has survived and developed as a discipline over the time facing challenges posed by sciences and social changes.
4. To develop knowledge of social and cultural context out of which the philosophy has emerged.
5. To understand the limitations of medieval philosophy as well as its transition to a new philosophical era based on rational approaches.

Course Learning Outcome (CLO):

After successful completion of this course, students will be able to-

CLO1. Recognize some basic philosophical terms and concepts which they can apply and relate to their subsequent philosophical studies;

CLO2. Interpret, synthesize and criticize open mindedly the different philosophical ideas;

CLO3. Analyze the philosophy of particular philosophers of the Ancient and Middle Ages and make comparisons and contrast between and among philosophical views.

CLO 2		√			√	
CLO 3	√	√				√

Course Contents

Topics	Teaching-Learning Strategies	CLOs
One. Introduction to Ancient Philosophy **Description**: Overview of Western philosophy's origins in Ancient Greece. Introduces the shift from myth to rational inquiry, the Pre-Socratics, and the scope of ancient philosophical questions (e.g., What is the universe made of? What is a good life?). **Key Concepts**: Cosmology, rational inquiry, the problem of change vs. permanence. **Two. The Sophists and Socrates** Description: Explores the Sophists' focus on rhetoric and relativism, contrasted with Socrates' emphasis on universal truths and the Socratic Method. Introduces Socratic questioning and its impact on ethics and epistemology.	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	CLO1 CLO2
Three. Plato and the Theory of Forms **Description**: Examines Plato's philosophy, focusing on his Theory of Forms, epistemology (divided line, allegory of the cave), and political philosophy (the ideal state). Connects to your interest in epistemology via Plato's view of knowledge as recollection. **Key Concepts**: Theory of Forms, allegory of the cave, philosopher-king, knowledge vs. opinion. **Four: Aristotle's Philosophy** **Description**: Introduces Aristotle's rejection of Plato's Forms, focusing on his metaphysics (substance, causation), epistemology (empiricism), and ethics (virtue ethics). Emphasizes Aristotle's practical approach and influence on later thought. **Key Concepts: Four causes, hylomorphism, virtue ethics, the golden mean.**	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	CLO1 CLO2
Five: Hellenistic Philosophy **Description**: Surveys post-Aristotelian schools: Epicureanism, Stoicism, and Skepticism. Focuses on practical ethics (e.g., Epicurean pleasure, Stoic virtue) and epistemological skepticism (Pyrrho's suspension of judgment). **Key Concepts**: Ataraxia, Stoic logos, Pyrrhonian skepticism. **Six: Transition to Medieval Philosophy** **Description**: Explores the shift from ancient to medieval philosophy, focusing on the integration of Greek philosophy with Christian theology. Introduces Neo-Platonism and its influence on early Christian thought. **Key Concepts**: Neo-Platonism, the One, synthesis of philosophy and theology.	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	CLO1 CLO2

Seven: Augustine and Early Christian Philosophy **Description**: Examines Augustine's synthesis of Neo-Platonism and Christianity, focusing on his views on free will, evil, and epistemology (divine illumination). Connects to your interest in epistemology via Augustine's theory of knowledge. **Key Concepts**: Free will, theodicy, divine illumination, faith and reason. **Eight: Thomas Aquinas and Scholasticism** Description: Explores Aquinas' synthesis of Aristotelian philosophy and Christian theology, focusing on his proofs for God's existence, natural law, and epistemology. Concludes with Scholasticism's legacy in medieval thought. **Key Concepts**: Five Ways, natural law, faith and reason, Scholastic method.	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	CLO1 CLO2

Course Code : 211705	Marks : 100	Credits : 4	Class Hours : 60
Course Title :	General Ethics		

Course Description:

Ethics is a branch of philosophy which study human conducts and evaluate them in terms of ethical standard and moral values. The question of what is right", "what is wrong", "what is good", "what is bad', are the core concern of ethics. This course is concerned with the fundamental ethical questions related to human life and it is designed to provide students basic knowledge on morality, values and ethical behavior.

Course Objectives:

The specific objectives of this course are:

1. To acquire basic knowledge on moral values and ethical standards:
2. To develop awareness of virtues and vices, moral and immoral actions;
3. To provide knowledge about the ethical standards of action;
4. To develop fellow feeling among the students through moral motivation:
5. To develop eagerness to be a good citizen through moral motivation.

Course Learning Outcomes (CLOs):

After successful completion of this course, students will be able to:

CLO 1: Define and explain key ethical concepts, distinctions (e.g., right and wrong, good and evil), and major ethical theories (e.g., utilitarianism, deontology, virtue ethics).

CLO 2: Analyze and evaluate moral arguments and ethical dilemmas using logical reasoning.

CLO 3: Compare and contrast normative ethical theories and their applications in real-life situations.

CLO 4: Apply ethical reasoning to contemporary moral and social issues (e.g., justice, equality, environment, human rights).

CLO 5: Demonstrate ethical awareness and personal responsibility in decision-making.

Topics	Teaching-Learning Strategies	CLOs
Group A 1. Introduction to Ethics and Moral Philosophy Definition and Scope: Ethics is a branch of philosophy that examines what is good, right, and virtuous. Differentiating between ethics (objective principles) and morality (personal convictions). Basic Ethical Ideas: • Virtues: Being kind, honest, or fair. • Rules: Why do we follow rules (e.g., "don't lie"). • Consequences: How actions affect others (e.g., helping vs. harming). • Ethics vs. Morality: Understanding ethics as a system for thinking about right and wrong, and morality as personal or cultural beliefs. • Examples in Daily Life: Discussing simple scenarios like sharing, telling the truth, or helping others to illustrate ethical choices. Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	CLO1 CLO2
2. Basic Ethical Concepts **Subject Matter**: i. Exploring core ideas like fairness, honesty, kindness, and responsibility. ii. Understanding moral dilemmas through simple scenarios (e.g., Should you tell the truth if it hurts someone's feelings?). iii. Analyzing simple moral dilemmas, such as: i. should you return extra change given by mistake at a shop? ii. Is it okay to copy a friend's homework? iii. How should you respond to someone being unkind? Heinz Dilemma, Trolley's Dilemma, Dilemma of Sophie's Choice. iv. Moral action: voluntary, non-voluntary, and involuntary actions. 3. **Pattern of Ethics**: Normative ethics, meta-ethics, Bio-ethics, practical ethics, environmental ethics	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	CLO2 CLO3
4. Postulates of Ethics: Postulate 1: Existence of Moral Values • Plato's idea of the "Good" as an objective reality. • Modern debates on moral realism (moral values exist independently) vs. moral relativism (values depend on culture or individual).	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	CLO2 CLO3

Postulate 2: Human Agency and Moral Responsibility • Free will in Kant's deontology: Moral responsibility requires the ability to choose freely. • Determinism debates (e.g., Hume): Are actions predetermined or freely chosen? 5. **Introduction to Moral Progression** • Understanding moral progress as the improvement in moral values, practices, or understanding over time, at the individual or societal levels. • Introducing moral progress in Western philosophy, such as Enlightenment ideas of advancing moral norms or utilitarianism's focus on increasing happiness. 6. **Introduction to Moral Relativism** Types of moral relativism: i. Descriptive Relativism, ii. Normative Relativism, iii. Metaethical Relativism. **Arguments For and Against Moral Relativism**		
7. **Theories of punishment** : **Definition of Punishment**: Understanding punishment as a deliberate imposition of harm or penalty for a perceived wrong, typically by an authority (e.g., parents, schools, or legal systems). **Subject matter**: Why do we punish? Is punishment fair? Can it be morally justified? Introducing philosophical perspectives on punishment, such as retribution, deterrence, and rehabilitation. 8. Normative Ethical Theories **a. Agent-Based Ethical Theories** **i.** Ethics that evaluates actions based on the moral character, intentions, or motivations of the agent (e.g., acting out of compassion or integrity). **ii.** Hume's emphasis on moral sentiments (e.g., sympathy) and contemporary agent-based theories (e.g., Michael Slote's ethics of care). **iii.** Virtue Ethics: Focus on moral character and virtues, drawing from philosophers like Plato, Aristotle, or Confucius. Emphasis on living a good life through virtuous behavior. **b. Duty-Based Ethical Theories** Ethics based on following moral rules or duties, regardless of outcomes (e.g., "do not lie"). Kant's categorical imperative (act according to rules that can be universalized, e.g., "always tell the truth"). c. **Deontology and Teleology** **Deontology:** Duty-based ethics, particularly Kant's categorical imperative, which emphasizes universal moral rules.	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	CLO3 CLO4 CLO5

Teleology: Utilitarianism/Consequentialism**:** Outcome-based ethics, focusing on maximizing overall happiness or good consequences, as proposed by Bentham and Mill. **d. Comparing Agent-Based, Virtue, and Duty-Based Ethics** **Subject Matter : Similarities**: All focus on the moral agent (character, virtues, or duties) rather than just outcomes. Differences**: Agent-Based: Emphasizes intentions/motivations (e.g., acting out of compassion).**

Course Code : **211707**	Marks : **100**	Credits : **4**	Class Hours : **60**
Course Title :	**Psychology**		

Course Description:

Psychology is a science of experience and behavior. It tells us how the mind works and behaves. It can predict the behavior of an individual, and control it to a certain extent by putting him under proper conditions. It seeks to discover the laws of mind and laws of behavior. Behavior is the expression of experience. Thus, Psychology is concerned with experience and behavior of the individual in relation to the environment.

Course Objectives:

The specific objectives of this course are:

1. To know the major issues and theories of psychology-
2 To understand the key role that psychology plays in our everyday lives.
3. To acquire better insight about individual's behavior.
4. To understand the scientific methods and their application to psychology.
5. To gain a more accurate and comprehensive understanding of human behavior and mental life in general.

Course Learning Outcomes (CLOs):

After successful completion of this course, students will be able to:

CLO1: Explain the fundamental concepts, branches, and methods of psychology.

CLO2: Identify and describe major psychological theories related to behavior, learning, perception, memory, and emotion.

CLO3: Analyze the relationship between psychological and philosophical approaches to understanding the mind and behavior.

CLO4: Apply psychological insights to philosophical problems such as consciousness, identity, motivation, and ethics.

CLO5: Develop critical thinking, observation, and reflection skills to understand human nature and social behavior.

Course Contents

Topics	Teaching-Learning Strategies	CLOs
1. Key Terms: Psychology, Behavior, Mental Processes, ***Yoga***, Cognition, Emotion, Culture. **Definition of Psychology**: Understanding psychology as the scientific study of behavior and mental processes (e.g., thoughts, emotions, actions). **Scope of Psychology**: Exploring areas like cognition, emotion, personality, development, and social behavior. 2. Historical and Cultural Foundations of Psychology Early psychology: Wundt's experimental psychology and structuralism. Key schools: Behaviorism (Pavlov, Skinner), psychoanalysis (Freud), and humanism (Rogers, Maslow). **Examples**: Meditation as a tool for mental health (Indian) vs. Pavlov's conditioning experiments (Western).	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	CLO 1 CLO 2
3. Biological Bases of Behavior **Brain and Nervous System**: Basic structure and function of the brain, neurons, and neurotransmitters in influencing behavior and emotions. Role of the brain (e.g., amygdala for emotions, prefrontal cortex for decision-making) and genetics in behavior. **Examples**: How stress affects the brain; how *pranayama* (breathing exercises) calms the nervous system. **Applications**: Understanding mood changes or concentration difficulties in daily life. 4. Sensation and Perception **Sensation**: How we receive sensory information (e.g., seeing, hearing, touching). **Perception**: How we interpret sensory information to understand the world. **Indian Perspective**: Role of mindfulness (*dhyana*) in sharpening sensory awareness. **Western Perspective**: Theories of perception (e.g., Gestalt principles) and sensory thresholds. **Examples**: Mistaking a rope for a snake in dim light (perception error); using meditation to focus attention. **Applications**: Recognizing how distractions affect studying or how cultural symbols shape perception.	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	CLO 2 CLO 3
5. Learning and Memory Learning: How behavior changes through experience. Classical conditioning (Pavlov): Learning through association (e.g., feeling hungry at the sound of a lunch bell). Operant conditioning (Skinner): Learning through rewards and punishments. Memory: Processes of encoding, storing, and retrieving information. Models of memory (e.g., short-term vs. long-term memory). Examples: Memorizing for exams; learning to avoid touching a hot stove. Applications: Improving study habits or managing forgetfulness. 6. Emotion and Motivation Emotion: Understanding feelings like happiness, anger, or fear and their impact on behavior.	Lecture, Group Discussion, Media tools, Interactive brainstorming and Q/A session	CLO 2 CLO 3 CLO 4

Motivation: Forces that drive behavior (e.g., hunger, achievement, social approval). Theories of emotion (e.g., James-Lange, Cannon-Bard). Maslow's hierarchy of needs (e.g., basic needs to self-actualization). Examples: Feeling nervous before a speech; striving for good grades. Applications: Managing stress or motivating oneself for goals. 7. Personality and Individual Differences Personality: Consistent patterns of behavior, thoughts, and emotions. Indian Perspective: Gunas (sattva, rajas, tamas) in Bhagavad Gita as influencing personality traits. Western Perspective: Trait theories (e.g., Big Five: openness, conscientiousness, extraversion, agreeableness, neuroticism). Psychoanalytic theory (Freud): Role of unconscious in personality. Examples: Why some people are shy while others are outgoing; how sattva promotes calm behavior. Applications: Understanding personal strengths or appreciating differences in others.		
8. Social Psychology **Social Influences**: How others affect behavior (e.g., peer pressure, conformity). **Indian Perspective**: Role of family, community, and collectivism in shaping behavior. **Western Perspective**: Social influence: Conformity (Asch), obedience (Milgram). Attitudes and persuasion: How beliefs change through social interaction. **Examples**: Following group norms in school; respecting elders in Indian culture. **Applications**: Navigating peer pressure or promoting teamwork. 9. Applied Psychology: Every day and Cultural Contexts **Everyday Applications**: Managing stress through meditation or time management. Improving relationships through empathy and communication. Course Code:	212009	Marks:100	Credits: 4	Class Hours: 60
Course Title:	Introducing Sociology			

Course objectives

The course is designed to provide foundational knowledge of sociology as a social science. It will explain key concept, principles and perspectives in sociology. It will highlight various structural issues like major social institutions, inequality, social classes, population and urbanization. Besides this, the course helps the students to develop sociological thinking to understand society and human behavior.

Course Learning Outcome (CLO)

After going through the course, students will be able to learn the following outcomes

CLO1	Students will be demonstrating knowledge about preliminary ideas of sociology.
CLO2	They will be informed about the contributions of sociologists.
CLO3	They will apply several procedures of scientific social research.
CLO4	They will explain various terms of culture and cultural diversity in society.
CLO5	Students will get knowledge about different types and evolution of society.
CLO6	Students will know both about social institutions and various factors which contribute to social stratification and mobility within society.
CLO7	They will recognize different social problems of Bangladesh.
CLO8	They will be able to analyze the influences of social forces on individual behavior and social change which happens globally.

Course Title: Introduction to Social Work (Allied Course)			Course Orientation: Theoretical	

Course Description

Introductory social work is an allied course for the registered students of respective disciplines. The focal objective of this course is to spread basic knowledge of social work education along with the concept, methods, relationship of social work with other disciplines, practice in different settings and social work as a profession. The course also covers industrial revolution, the philosophical foundations of social work, the development of professional education and its relationship with various religious creeds. Ethical principles and values are also discussed in this course.

Course Objectives

The objectives of this course encompass:

- To familiarize students about historical development and associated disciplines of social work;
- To help students able to understand the social work profession and industrial revolution;
- To attain knowledge about major social problems and intervention of social work;
- To introduce students about social work methods, types and practice in different settings;
- To introduce students to research and social research in social work arenas;
- Introduce students to religious and philosophical foundations of social work.

Course Contents

Chapter	Topics	Teaching Learning Strategy	CLOs
1	**Concepts Relevant to Social Work Practice:** Social Work, Social Welfare, Social Value, Social Reform, Social Legislation, Social Security, Social Development, Good Governance, Climate Justice, Field Work.	Class Lectures, PP Presentations, Content Analysis	CLO1
2	**Associated Disciplines and Their Relations with Social Work:** Sociology, Psychology, Economics, Political Science, Law, Journalism, Medical and Public Health, Anthropology.	Lesson Plans, Lectures, Handouts, Paraphrasing	CLO1
3	**a. International Growth and Development of Social Work:** UK and USA. **b. Social Welfare Practices and Movements in Undivided India and Bangladesh:** Traditional Welfare Activities and Charity, Social Reformers and their Movements. **c. Evolution of Social Work Education in the Sub-continent and Bangladesh.**	Lectures, Handouts, Exhibition of Audio-Visual Recordings, PP Presentations.	CLO2
4	**Social Work Profession**: Profession, Occupation, Social Work as a Profession, Values and Professional Code of Ethics of Social Work, NASW.	Lectures, Seminar Presentation, Group Discussion.	CLO2

5	**Social Problems and Social Services in Bangladesh:** Major Social Problems and Intervention of Social Work, Social Work Practice in Govt. Organizations (USS, RSS) and NGOs, Probation and Parole.	Lectures, Content Analysis, Visit And Demonstration	CLO3
6	**Industrial Revolution (IR):** Renaissance, Globalization, Industrialization, Urbanization, Impacts of IR on Society, Facing 4th IR challenges with Communication skill, Analytical Ability, Problem Solving Ability, Digital Literacy and Adaptability; Skills of Social Work,5th Industrial Revolution and Social Work.	Lectures, Handouts, Audio-Visual Recordings, Visit And Demonstration. symposium,	CLO4
7	**Types and Methods of Social Work:** Types, Green Social Work, Basic and Auxiliary Methods; Concept, Elements, Principles, Significance of Social Work Methods in Bangladesh.	Lectures, Content Analysis, Seminar presentation, Group Discussion	CLO5
8	**Social Research:** Research, Research as a Scientific Method, Social Research, Methods, Techniques and Tools of Social Research, Sampling and Its Types, Research Proposal, Importance of Social Research.	Lectures, Handouts, Reading, Assignments, Content Analysis	CLO5
9	**Social Philosophy and Religion:** Social Philosophy, Individualism, Socialism, Welfare State, Contribution of Major Religions on Social Work and Humanity, Philosophical, Religions and Humanitarian Basis of Social Work.	Lectures, PP presentations, Workshop etc. according to pedagogy.	CLO6

Course Learning Outcomes (CLOs)

After Fruitful conclusion of the course apprentices can be able to:

CLO1: Know about the related concepts and associated disciplines of social work;
CLO2: Elucidate the international growth and development of social work profession;
CLO3: Demonstrate major social problems and social services in Bangladesh;
CLO4: Understand the Industrial revolution and its challenges;
CLO5: Know about social work types, methods of social work and social research;
CLO6: Understanding of social philosophy, religions and social work.

Course Title: Introduction to Political Science			

Course Learning Objectives:

a. To absorb the basic concepts of political organization and their composition, functions and institutional structures;
b. To identify various forms of government and organs of the state;
c. To identify and explain the central principles, institutions, procedures, and decision-making processes of the political system;
d. To evaluate the basic strengths and weaknesses of the political systems of the Western World;
e. To give knowledge about the theoretical and practical role of state, their governmental organs and the relationship among legislatures, executives and judiciaries.

Course Learning Outcomes (CLOs):

At the end of the course, students should be able to:

CLO 1	understand the basic concept of political organizations, relations and functions of institutional structure;
CLO 2	think critically why countries choose different mechanisms and institutions for governing and why these choices are important;
CLO 3	Develop a sound knowledge about the major concepts, and tools of political science and the relationships among organs of the government and their application in different countries.

Course contents

Topic	Course contents	Teaching Learning Strategy	CLOs
1	Introducing Political Science, Definition, Scope, Nature, State and Society, State and Government, Theories of the Origin of State. **Fundamental Concepts:** Sovereignty, Law, Liberty, Rights, Nation, Nationalism, and Internationalism.	Lecture Assignment	CLO 1
2	**Constitution:** Definition, Necessity, Methods of Establishing Constitution, Characteristics of a Good Constitution, supremacy of the Constitution, amendment process.	Lecture Assignment	CLO 1
3	**Forms of Government:** Democracy and Dictatorship, Parliamentary and Presidential, and Unitary and Federal.	Lecture Assignment	CLO 1 CLO 2
4	**Organs of State:** Legislature-Its Importance and Functions, Unicameral and Bi-cameral Legislature, Decline of the Power of the Legislature; Executive – Its Importance and Functions, Growing Power of the Executive, Cabinet Dictatorship; Judiciary – Its Importance and Functions, Independence of Judiciary, Judicial Review.	Lecture Assignment	CLO 2
5	**Separation of Powers, Representation:** Proportional and Majoritarian Representation, and Consociationalism.	Lecture Assignment	CLO 3
6	**Political party:** Origin and development of Political parties, Coalition Politics, Functions of Pressure Groups, Difference between Political Parties and Pressure Groups, Bureaucracy and Pressure Groups.	Lecture Assignment	CLO 1 CLO 2
7	**Public Opinion:** Its Meaning, and Significance State and Civil Society, Governance, Good Governance.	Lecture Assignment	CLO 3

Course Code:	219901	Marks: 100	Credits: 4
Course Title:	History of Bangladesh: Language, Culture, and Identity		Hours: 60

Course Objectives:

This course is designed to help undergraduate students from diverse academic backgrounds develop a comprehensive and nuanced understanding of the historical development of Bangladesh, with a particular focus on its language, culture, and identity. By critically examining a variety of historical events, socio-political movements, and cultural shifts from ancient times to the contemporary period, students will have the opportunity to trace the evolution of the Bengali nation. The course aims to foster informed citizenship through an exploration of the Liberation War, identity formation processes, cultural heritage, the lives and contributions of key political figures, and the roles of ethnic minorities. Ultimately, the objective is to equip learners with the intellectual tools necessary to contextualize current national debates and to recognize the role of youth and globalization in shaping the future of Bangladesh.

Course Learning Outcomes (CLOs):

At the end of the course, learners will be able to

CLO 1: Recall key historical events, dates, movements, personalities, and cultural developments that contributed to the emergence of Bangladesh from the pre-colonial period to the present day.

CLO 2: Demonstrate an understanding of the socio-political, linguistic, and cultural influences that shaped Bengali identity and nationalism, emphasizing the Language Movement, Liberation War, and subsequent democratic uprisings.

CLO 3: Apply their historical and cultural understanding to interpret contemporary national issues and debates relating to identity, political reform, and cultural transformation in Bangladesh.

CLO 4: Analyze how historical events, political ideologies, and social changes are interconnected in shaping the current socio-political landscape of Bangladesh, with a particular emphasis on the roles of movements, minorities, and the youth.

Course Contents:

Course contents	Teaching Learning Strategy	CLOs
1. Pre-colonial Era • Life and Culture of the People in Ancient Bengal • Bengal Under Muslim Rulers: Society, Culture, and Religion • Role of the Sufis in Preaching Islam and Impacts of • Sufism in the Bengali Society • Bengali Society and Culture in the Writings of Foreigners	Interactive lectures	CLO 1-2

2. Colonial Era (18th and 19th Century) • The Battle of Plassey (1757) and the Beginning of British Colonialism • Bengal Renaissance • Reforms in Hindu Society • New Forms in Bengali Literature and Culture • The Muslim Response to Western Education	Interactive lectures, reading, and assignments	CLO 1-2
3. Colonial Era (First Half of the 20th Century) • Partition of Bengal (1905) • Hindu-Muslim Disagreements • Formation of the All India Muslim League (AIML) • Muslim Shahitya Samaj • Buddhir Mukti Andolan: The Urge for Rational Thinking in Bengali Muslim Society • Growth of Religion-based Identity • Politics of Hindutva and the Two-Nation Theory • Spread of Communalism in Society • The Partition of India and Bengal	Interactive lectures and group discussions	CLO 2-3
4. Post-Partition Era (1947-1971) • Language Movement • Political, Economic, and Cultural Aspects • Growth of Vernacular Nationalism • Cultural Activism	Interactive lectures and group discussion	CLO 2-3
5. Changing Bengali Identity • The Evolution of Bengali Identity in the Context of Language, Culture, and Religion • From Ancient Times to the Present • The Role of the Bengali Language in Shaping Identity • The Language Movement of 1952 and Its Long-term Impact on National • Consciousness • The Influence of Religion on Bengali Identity • The Impact of Socio-political Movements on Identity Formation • The Liberation War of 1971 • Contemporary Debates on Bengali Identity • The Role of Youth in Redefining Identity • The Influence of Globalization	Interactive lectures and thematic assignments	CLO 2-3
6. Liberation Movement of 1971 and Mass Uprising till 2024 • The Political and Economic Exploitation of East Pakistan by West Pakistan • Six (6) Points Movement, Uprising of 1969 • The 1970 General Elections	Interactive lectures, group discussions, and thematic assignments	CLO 1 CLO 3-4

• The Non-cooperation Movement and the Declaration of Independence • The Role of AK Fazlul Haque, Huseyn Shaheed Suhrawardy, Maulana Bhashani, Sheikh Mujibur Rahman, and Ziaur Rahman • The Liberation War of 1971 • Genocide and Resistance • The Role of the Mukti Bahini • Post-independence Challenges • Nation-building • Political Instability • Mass Uprisings and Democratic Movements • The Anti-autocracy Movement of the 1980s • The 1990s Movement for Democracy and Afterwards • The 2024 Movements for Political and Social Reforms		
7. History of Other Ethnic Groups • The Indigenous Communities of Bangladesh • Historical Presence • Cultural Practices • Land Rights and Cultural Assimilation • Contributions and Sacrifices • Political Representation of Ethnic Minorities	Interactive lectures and group discussions	CLO 4
8. Cultural Heritage and Modern Transformations • The Evolution of Bengali Culture • From Ancient Traditions to Modern Expressions • The Role of Literature, Music, and Art in Shaping Bengali Identity • Contributions of Rabindranath Tagore, Kazi Nazrul Islam, and Other Cultural Icons • The Impact of Globalization on Bengali Culture • The Revival of Traditional Arts • The Role of Youth in Cultural Innovation Urbanization • Environmental Changes • The Commodification of Culture	Interactive lectures, documentary screening, and thematic assignments	CLO 1-4

Course Code	219903	Marks: 75	Credits: 3
Course Title:	Information and Communication Technology		

Course Objectives:

The main objective of the course is to develop students' understanding and skills in using, managing, and applying technology to solve problems and enhance various aspects of life and work. Key areas of focus include understanding ICT systems, software, hardware, networks, and their applications.

Course Learning Outcomes: The student will be able to:

CLO 1	Explain foundational ICT concepts, including the information processing cycle.
CLO 2	Operate standard computer hardware and software systems effectively.
CLO 3	Use office productivity tools (Word, Excel, PowerPoint) for academic and professional tasks.
CLO 4	Apply safe internet practices and use internet tools for communication and information retrieval.
CLO 5	Understand and explain the concepts of Data Analytics, Artificial Intelligence (AI), and Machine Learning (ML)
CLO 6	Understand the concept of free-lancing

Course Contents:

Unit	Specific Objectives	Content	Teaching and Learning Approach
Unit 1: Introduction to Information and Communications Technology (ICT) and Computer System	The student will be able to: • Explain the concept of ICT and its related terminologies. • Describe the information processing cycle. • Analyze the impact of ICT on educational, social and economic development. • Identify career opportunities in ICT education. • Differentiate among the classes of computers	Definition of ICT, basic concepts and terminologies. Data, Information Application of ICT, Advantages and Disadvantages of ICT, Impact of ICT Career opportunities in ICT education Information Processing Cycle. Classification of Computers The Vital Components of the Systems Unit.	Classroom Lectures

	and the usages of them. • Identify the vital components of the Systems Unit.		
Unit 2: Computer Hardware and Software	The student will be able to: • Describe the categories of Computer Hardware. • Describe the commonly used Input and Output devices • Identify the main processing devices, storage devices and media. Identify the main communication devices. • Identify types of Software packages. • Distinguish between an Operating System and Application software. • Identify different types, examples and uses of Operating Systems and Application software • Distinguish between Open Source and Proprietary Software.	Categories of Computer Hardware: Input devices, Processing devices, Output devices, Storage devices Communication devices, Main Processing Devices: The Processor, Control Unit and Arithmetic and Logic Unit Software Packages, Operating Systems, Types and uses of Operating Systems, Types and uses Application Software: Educational software, Games software, Graphics software Browsers: Internet explorer, Google chrome, Mozilla Firefox, Opera, Internet explorer, Mozilla Firefox; Proprietary and Open Source Software	Classroom lectures and Lab
Unit 3: Introduction to Word Processing Application	• The student will be able to: • Identify Word Processing packages. • Create and save a document using the Word Processor. • Format a Word document using formatting tools. Demonstrate the ability to perform collaborative editing. • Insert tables in a Word Processing document. • Insert symbols and pictures in Word	Word Processing Packages and Their Uses. Introduction of Microsoft Word Software. File creation and saving: New, Save, Open, Save As. Editing: Copy/Cut, Paste, Undo, Redo, Find, Replace, Clipboard, Sub-Headings And Paragraphs, Text Correction, Wrapping Text, Text Orientation **Formatting:** Font: Style, Size, Color, Bold, Underline, Italic, Superscript, Subscript, Shadow, Strikeout.	Classroom Lectures, Lab, and Hands-on Practice

	Processing documents. • Use layout techniques in document creation. • Inserting headers and footers. • Print documents using the various print options.	Paragraph: Alignment, Bullet & Numbering, Indent, Line Spacing, Table Border **Insert:** Table, Picture, Shape, Smart Art, Chart, Header, Footer, Page Number, WordArt, Drop Cap, Symbols, Equations, Hyperlink, Comment. **Page Design:** watermark, page border **Layout:** Page setup, print	
Unit 4: Spreadsheet Application	• The student will be able to: • Identify Spreadsheet Packages. • Explain the importance of the Spreadsheet application in data management. • Explain related concepts and terminologies in the Spreadsheet. • Identify features in the Spreadsheet application window. • Create and save a Workbook. • Construct and insert simple formulae and functions. • Format the worksheet using formatting tools. • Printing a worksheet.	Spreadsheet Packages, e.g. Excel. Importance of Spreadsheet application in Data Management, Related Concepts and Terminologies (e.g., cell(s), rows, columns, worksheet, workbook) Excel Tool Bars: Formatting Bar, Standard Bar, Formula Bar. Types of Data and Their Uses (e.g., number, date, text, currency), Creating and Saving a Workbook, Formula and Functions, Sorting, filtering, validation, creating pivot table. Formatting Worksheet Using Formatting Tools. Draw Graph/chart, Printing Worksheet.	Classroom Lectures, Lab and Hands-on Practice
Unit 5: Presentation Application	• The student will be able to: • State the importance of the Presentation application. • Identify the commonly used features of a Presentation application while prepare a presentation. • Create and save	Presentation Applications Packages, Devices used for Presenting, Importance of Presentation Application, Principles for Designing Presentations, Terminologies in Presentation Application (eg, , Slide transitions, Slide show, etc.), Commonly Used Features of Presentation Application	Classroom Lectures, Lab and Hands-on Practice

	presentations using a template, Add new slide(s). Edit text, Format text, Insert objects, images and pictures, Run slide show, Apply transition, animation effects to slides • Select the print option for printing. • Prepare a presentation on a selected topic and present it.	Window: Toolbars, Different presentation view modes Prepare a Presentation: Slide creating, editing, theme, background, inserting elements (image, audio, video hyperlink, table, smart art, graph, etc.) and formatting slides, Slide Layout, slide Show, slide transition, animation Effects. Selection of Print Option: Entire presentation, Specific slides, Handouts, Notes pages, outline view of slides.	
Unit 6: Privacy and Security	The student will be able to: • Understand the basics of digital security • Use some security tools. • Understanding digital ethics.	Introduction to Information Security, cybercrime, DoS and DDoS Attack, Key Management, Digital Signature and Certifications, privacy, Data Security, Vulnerability, Threat and Risk, Malware, Social Engineering, Hacking, Plagiarism, Fishing, Software Piracy, Worms and Viruses, Spam, Adware, Malware, Spyware, Antivirus Software Ethics in the digital world	Classroom Lectures, Lab and Hands-on Practice
Unit 7: Using The Internet to Communicate and Accessing Information	• The student will be able to: • Explain basic concepts, requirements, and terminologies of the Internet • Apply the rules and regulations in the use of the internet. • Using email • Use the internet social network to communicate. • Use Uniform Resource Locators (URLs) to access Information. Use search engines to access information • Upload files to virtual drives and work on it.	Internet, Intranet, Extranet, IP Address, Masking, MAC Address, Internet Services, OSI Reference Model, TCP/IP protocol stack, IPv4, IPv6, subnet Masking, MAC Address, Internet Services, Network Configuration and Troubleshooting, Wi-Fi, Broadband, Email Usage. Rules and Regulations in the Use of the Internet: Spam-Unsolicited Emails, People's Privacy, Intellectual Property Rights, etc. E-mail: Creating an Email Account, Sending, Accessing Email Messages, Attaching Documents to Email Messages, Using the Internet: Social	Classroom Lectures, Lab and Hands-on Practice

		Networks to Communicate, Uniform Resource Locators (URLs) to Access Information, Using Search Engines, Downloading Information from the Internet. Transferring Information from the Internet to a Different Application Intellectual Property Rights, ICT Policy, Software Piracy etc. Using Cloud Space: Google Drive, Google Workspace, OneDrive, Dropbox, etc.	
Unit 8: Emerging Technologies: Data analytics, Artificial intelligence, Machine learning	• Define Data Analytics, Artificial Intelligence (AI), and Machine Learning (ML). • Understand how data is collected, processed, and used for decision-making. • Recognize the role of AI and ML in everyday life. • Explain basic differences between AI and ML. • Discuss benefits and challenges of these technologies. • Recognize current trends and career opportunities in these fields.	**Introduction to Data Analytics:** Define Data, Types of Data, Define Data Analytics, Basic Steps in Data Analytics, Applications of Data Analytics, Common Tools of Data Analytics (Excel, Tableau, Power BI, Python, SQL, etc.). **Artificial Intelligence (AI):** Define AI, Objectives of AI, AI capabilities, AI applications (NLP, Image Recognition, Predictive Analytics, Recommender Systems, Robotics, etc.); **AI Tools**: OpenAI GPT, TensorFlow, PyTorch, Keras, Scikit-learn,etc.), AI in daily life (Voice assistants, facial recognition, GPS route suggestions, chatbots, etc.) . **Machine Learning (ML):** Define Machine Learning (ML), How It Works, Classification of ML, applications of ML, and common ML platforms (Teachable Machine, TensorFlow, PyTorch, Microsoft Azure Machine Learning, etc.). Relationship Between Data	Classroom Lectures, Lab and Hands-on Practice

		Analytics, AI, and ML Benefits & Challenges of Data Analytics, AI, and ML. Future Trends & Career Paths.	
Unit 9: Introduction to Freelancing	The student will be able to: • Define and explain the fundamental concept and significance of freelancing in the global context. • Identify and categorize various online marketplaces and professional fields. • Develop professional profiles, portfolios, and proposals suitable for freelancing platforms. • Demonstrate the use of online payment systems and financial transaction methods. • Analyze and evaluate strategies for career development and effectively apply techniques to overcome freelancing challenges.	Introduction and Basic Concepts, Fields of Freelancing, Essential Skills and Preparation, Introduction to Freelancing Marketplaces, Creating Profile and Portfolio, Earning and Transaction Process, Building a Freelancing Career, Challenges and Solutions.	Classroom Lectures, Practical Demos, Assignments, Discussions

List of Books:

Norton, P. (2008). *Introduction to computers* (9th ed.). The McGraw-Hill.

Comer, D. E. (2018). *The internet book: Everything you need to know about computer networking and how the internet works* (5th ed.). Chapman and Hall/CRC Press.

Lambert, J., & Frye, C. (2015). *Microsoft Office 2016 step by step*. Microsoft Press.

Hassan, N. A., & Hijazi, R. (2017). *Digital privacy and security using Windows: A practical guide*. Apress.

Maheshwari, A. (2024). *Data analytics made accessible*. Jay Cobb.

Russell, S. J., & Norvig, P. (2020). *Artificial intelligence: A modern approach* (4th ed.). Pearson.

Alpaydin, E. (2020). *Introduction to machine learning* (4th ed.). MIT Press.

Course Code	219904	Marks: 25	Credit: 1
Course Title:	Lab: Information and Communication Technology		

Course Objectives:

The main objective of the course is to teach the students' understanding and skills in using, and applying technology to solve problems and enhance various aspects of life and work. It includes assembling hardware, installing software, preparing PPT slides, and producing Word and Excel documents.

Course Learning Outcomes:

The student will be able to:

CLO 1	Learn assembling hardware
CLO 2	Prepare, edit and print Word documents and excel
CLO 3	Prepare Power Point presentation.
CLO 4	Access information from Internet, e-mail
CLO 5	Installation of anti-virus software
CLO 6	Data collection, Prediction, Pattern recognition, classification
CLO 7	Exploring markets, Proposal writing, Simulation strategies

List of Experiments

CLO Addressed	Unit	Experiments	Teaching Learning Approach
CLO1	1-4	• Assemble different hardware • Install different software • Operate the computer - Drive, folder and file management • Maintenance	Lab and Hands-on Practice
CLO 2	3	**Word** • Prepare a Word document on a specific topic (e.g, routine, question paper, CV, reports, applications) • Formatting the document (Alignment, table, border, watermark, etc.), e.g., newspaper article, academic report, or documentation used in daily life, book, poster • Print documents with different paper and printers	Lab and Hands-on Practice

CLO 2	4	• **Excel** • Prepare a grade sheet • Prepare a family expenditure • Prepare a business expenditure report • Prepare payroll management, with a report • Create graphs on the given data • Print Excel files	Lab and Hands-on Practice
CLO 3	5	**Power point** • Prepare an academic presentation on a specific topic. • Formatting the slides & using different tools. • Apply animation and transition • Print PPT files in different modes: Hand note, Slides shorter, outline	Lab and Hands-on Practice
CLO4	6	• Install antivirus software, e.g., Norton Antivirus, McAfee, Kaspersky, Avast.	Lab and Hands-on Practice
CLO5	7	• Use of email • Access information from the internet, use a search engine. • Use of virtual drive for collaboration • Google Meet	Lab and Hands-on Practice
CLO6	8	• Data Collection and Visualization (Excel) • Simple Prediction (Excel) • Pattern recognition (Teachable Machine) • Classification (Teachable Machine)	Lab and Hands-on Practice
CLO7	9	**Free lancing** • Marketplace exploration and portfolio creation • Proposal writing • Payment simulation	Lab, Hands-on, Group Work, Discussion

Instructions for the Lab:

1. Lab sessions should be hands-on, with students engaging in tasks like assembling hardware, installing software, and using office tools.
2. Software like Microsoft Word, Excel, PowerPoint, and Teachable Machine will be used for document creation, data analysis, and basic machine learning.
3. Labs also include antivirus installation, email use, and online collaboration via Google Meet and Drive, emphasizing teamwork and problem-solving.

Instructions for the Lab exam:

1. The lab exam is individual. Students must answer two out of seven questions.
2. Marks distribution: Experiment (20 marks, 10 for each) for practical tasks, Viva-Voce (5 marks) for oral assessment. Total: 25 marks.

List of Books:

Comer, D. E. (2018). *The internet book: Everything you need to know about computer networking and how the internet works* (5th ed.). Chapman and Hall/CRC Press.

Lambert, J., & Frye, C. (2015). *Microsoft office 2016 step by step*. Microsoft Press
