NATIONAL UNIVERSITY BANGLADESH

PROVISIONAL

Syllabus
Bachelor of Science (Honors) Second Year
Department of Psychology

Effective from the Session: 2024–2025 and onwards

Vision of the University

We expect that the hundredth anniversary of the National University, our commitment to "Progress for Everyone" will be evident in all areas of our operations and stakeholder engagements.

We leverage our core strength in education, research, and community engagement to address pressing global issues and foster sustainable development.

By 2042, National University aims to strengthen its positions as Bangladesh's top academic institution and rank among the world's leading universities. Our focus will be on expanding expertise building strategic partnerships and increasing our global influence. Our services will be measured by the achievements of the individuals and communities we serve.

Mission of the University

To promote "Progress for Everyone" by fostering transformative education, conducting pioneering research, and encouraging meaningful collaboration with individuals, communities, and partners both in Bangladesh and around the world.

Name of the Program: B.Sc. (Honours) in Psychology

Vision of the Program

To develop a nationally and internationally recognized center of academic excellence psychological education, research and professional development that advances scientific understanding of human behavior and mental processes, and contributes to individual, organizational, and societal well-being; and uphold ethical standard through evidence-based, compassionate, and globally competent practices.

Mission of the Program

1. **Academic Excellence:** Provide comprehensive, transformative, and scientifically grounded education in fundamental and applied psychology, and navigate its application in real life.
2. **Research & Innovation:** Foster empirical research, scientific inquiry, and innovative solutions to address contemporary mental health and psychosocial challenges.
3. **Ethical & Professional Competence:** Cultivate high ethical standards, empathy, and professional skills for leadership in clinical, organizational, educational, and developmental sectors.
4. **Community & Societal Impact:** Promote mental well-being, social responsibility, and community engagement to support sustainable human development in Bangladesh and the globe.

PROVISIONAL

Program Educational Objectives (PEOs)

PEO 1: Technical and Professional Competence
Graduates will demonstrate strong theoretical knowledge and practical skills in the field of Psychology enabling them to meet contemporary market demands in education, research, planning, and development sectors.

PEO 2: Research and Problem Solving
Graduates will be equipped to carry out collaborative, multidisciplinary research, evaluate environmental problems critically, and offer creative, evidence-based solutions to promote sustainable development in Bangladesh and the global arena.

PEO 3: Social Responsibility and Ethics
Graduates will demonstrate a strong sense of social, ethical, and environmental responsibility, making valuable contributions to environmental management, community development, and the accomplishment of the Sustainable Development Goals (SDGs).

PEO 4: Lifelong Learning and Leadership
Graduates will pursue lifelong learning through formal, informal, and/or non-formal education and professional development, demonstrating leadership, teamwork, and communication skills essential for adapting to the dynamic global landscape.

Program Learning Outcomes (PLOs):
At the time of graduation, B.Sc. (Honours) in Psychology, students will achieve the ability to:

PLO 1: Core Disciplinary Knowledge: Demonstrate a comprehensive understanding of fundamental concepts, theories, and frameworks in cognitive, developmental, social, clinical, biological, and educational psychology.

PLO 2: Application of Knowledge: Apply psychological theories and evidence-based practices to understand and address individual, group, and societal issues across diverse contexts.

PLO 3: Problem Solving and Critical Thinking: Identify, analyze, and propose solutions to psychological and behavioral problems using scientific reasoning, critical thinking, and ethical decision-making.

PLO 4: Research and Innovation: Design and conduct psychological research using appropriate methodologies for data collection, analysis, and interpretation, contributing to innovative insights into human behavior and mental processes.

PLO 5: Use of Modern Tools: Effectively utilize modern tools and technologies in psychological assessment, data analysis ((e.g., SPSS, R, N-VIVO) psychological labs, and digital mental health platforms, adhering to scientific and ethical standards**.**

PLO 6: Communication Skills: Communicate psychological concepts, data, and findings clearly and effectively in oral, written, and visual forms to both specialist and non-specialist audiences.

PROVISIONAL

PLO 7: Teamwork, Leadership, and Time Management: Demonstrate collaborative and leadership abilities in diverse teams, particularly in therapeutic, educational, research, and organizational settings**,** and showcase strong time management.

PLO 8: Professionalism and Ethics: Exhibit professional integrity, ethical conduct, empathy, and social responsibility in psychological practice, research, and community engagement.

PLO 9: Lifelong Learning: Recognize the importance of continuous learning and professional development to stay updated with evolving psychological practices, societal needs, and scientific advancements.

PLO 10: Societal and Environmental Responsiveness: Address psychological needs and challenges in local and global contexts, with sensitivity to cultural, societal, and contextual factors, aligning practices with the Sustainable Development Goals (SDGs).

PLO 11: Entrepreneurial and Employment Readiness: Demonstrate the skills, attitudes, and knowledge necessary for employment in clinical, counseling, academic, research, corporate, developmental, and non-governmental sectors, including entrepreneurial ventures in mental health and well-being.

PLO 12: Project Management: Effectively plan, organize, and execute academic and field based psychological projects.

Detailed Syllabus

Course Code: 8223451	Marks: 100	Credits: 4	Class Hour: 56
Course Title: Child and Adolescent Psychology			

Course Description

Child and Adolescent Psychology is designed to provide students with knowledge about the developmental processes that occur from conception through adolescence. It provides a comprehensive overview of normative development and empirically derived milestones in physical, cognitive and socio-emotional developmental domains. This course also presents an overview of major developmental theories, research methods used in developmental psychology and the application of knowledge of child and adolescent development in the real world.

Course Objectives

- Provide a foundational understanding of developmental concepts, patterns, genetic influences, and research methodologies across the lifespan.
- Examine major theoretical frameworks of child development and trace biological milestones from conception through birth.
- Analyze normative physical, cognitive, linguistic, emotional, and social progressions during infancy and childhood.
- Evaluate the bio-psychosocial transformations, challenges, and risk behaviors characteristic of adolescence.

Course Learning Outcomes (CLOs)

After successful completion of the course, the students will be able to:

CLO	Course Learning Outcomes (CLOs)	Bloom's Level	PLO
CLO1	Explain the fundamental concepts, goals, principles, patterns and stages and determinants of human development from prenatal period through adolescence.	Understand (C2)	PLO1, PLO9, PLO10
CLO2	Explain and compare major theories of child development including Freud's Psychoanalytic theory, Erikson's psycho-social stages of development, Piaget's theory of cognitive development and major perspectives on moral development.	Understand (C2) / Analyze (C4)	PLO1, PLO2, PLO3
CLO3	Analyze physical, motor, cognitive, language, emotional, social, and moral development during infancy, childhood, and adolescence in relation to biological and environmental influences.	Analyze (C4)	PLO1, PLO2, PLO3, PLO8, PLO10

PROVISIONAL

CLO4	Apply appropriate developmental psychology research methods and designs, including self-report, observational, case study, ethnographic, psycho-physiological, correlational, experimental, cross-sectional, longitudinal, etc. approaches.	Apply (C3)	PLO3, PLO4, PLO5, PLO8, PLO9
CLO5	Analyze the major developmental changes and tasks associated with adolescence, including puberty, sexuality, family and peer relationships, vocational choices, and cross-cultural approaches.	Analyze (C4)	PLO1, PLO2, PLO3, PLO6, PLO8, PLO10, PLO11
CLO6	Graduate developmental challenges and practical issues, including prenatal risks, birth complications, speech disorders, juvenile delinquency, substance abuse, school drop-out and suicide using relevant psychological theories and empirical evidences.	Evaluate (C5) / Analyze (C4)	PLO1, PLO2, PLO3, PLO4, PLO6, PLO8, PLO9, PLO10, PLO11,PLO12

Course Contents

Week	Topics	Teaching-Learning Strategies	Assessment Strategy	CLOs
1-2	**1. Introduction:** 1.1. Definition of Developmental Psychology 1.2. Divisions of the Life Span 1.3. Patterns of Development 1.4. Goals of Developmental Psychology 1.5. Practical application of developmental psychology	Interactive lectures, multimedia presentations, class discussion, question–answer sessions	Formative quiz, Classroom participation	CLO1
3-5	**2. Developmental Determinants:** 2.1. Biological determinants: 2.1.1. Maturation 2.1.2. Genetics 2.1.3. Physical factors 2.1.4. Brain development 2.1.5. Hormones 2.2. Environmental determinants: 2.2.1. Family dynamics 2.2.2. Culture	Interactive lectures, class discussion, question–answer sessions	Short written assignment, Reflection notes	CLO1
6-8	**3. Research Methods:** **3.1.** Self-Report: **3.**1.1. Interviews and Questionnaires, Dairy study, the Clinical method; **3.**2. Observation Method: **3.**2.1. Naturalistic Observation	Lectures, video demonstrations, case analysis, classroom discussion, question–answer sessions	Research method critique, In-class worksheet	CLO1

PROVISIONAL

	3.2.2. Structured Observations **3.**2.3. Others: Case studies, Ethnography, Psychophysiological methods, Twin studies; **3.3.** Research Designs: **3.**3.1. The Correlational design **3.**3.2. The Experimental design **3.**3.3. The Cross-cultural design **3.**3.4. The Cross-sectional design **3.**3.5. The Longitudinal design **3.**3.6. The Sequential design			
9-11	**4. Theories of Child Development:** **4.1.** Psychoanalytic theory of personality development **4.2.** Erikson's theory of personality development **4.**3. Piaget's theory of developmental stages	Interactive lectures, PowerPoint presentations, video content, group presentations,	Group presentation, Midterm examination	CLO2
12-14	**5. Prenatal Development:** 5.1. How life begins 5.2. Three stages of pre-natal development 5.3. Factors influencing prenatal development: 5.3.1. Maternal factors 5.3.2. Environmental factors	Interactive lectures, group activities, case discussions, question–answer sessions	Case study evaluation, Term assignment	CLO2
15-16	**6. Birth:** 6.1. Nature and Types of birth 6.2. The birth processes 6.3. Birth complications	Interactive lectures, video analysis, case discussions,	Short test, Class participation	CLO2
17-19	**7. Neonate:** 7.1. Physical appearance and assessment 7.2. Physiological functioning 7.3. Behavioral capacities 7.4. Sensory capacities	Interactive lectures, group discussions, students' presentations, question- answer sessions	Presentation evaluation, Quiz	CLO3
20-24	**8. Infancy and Childhood:** 8.1. Physical Development: Body growth 8.2. Motor Development: 8.2.1. The Sequence of motor development 8.2.2. Gross motor development 8.2.3. Fine motor development 8.3. Handedness 8.4. Play: 8.4.1. Types of play 8.4.2. Importance of play	Interactive lectures, group presentations, PowerPoint presentations, question–answer sessions	In-course exam, Analytical essay assignment	CLO3

PROVISIONAL

	8.5. Components of Language: 8.5.1. Phonological, semantical, syntactical, 8.6. How language develops 8.6.1. Speech disorder 8.7. Emotional Development: 8.7.1. Basic emotions 8.7.2. Factors influencing emotional development 8.8. Social Development: Processes in social development, Family influences, Societal influence 8.9. Moral Development: Piaget's theory, Kohlberg's theory			
25-28	**9. Adolescence:** 9.1. Physical Changes in Adolescence 9.2. Stage of Puberty 9.2.1. Growth spurt in height and weight 9.2.2. Changes in proportion and shape 9.2.3. Hormonal controls, primary sex characteristics, secondary sex characteristics, early versus late matures 9.2.4. Psychological effects of physical changes, developmental tasks of adolescence 9.2.5. Adolescent sexuality: cultural influences on sexuality, sexual attitudes, sexual behavior 9.2.6. Adolescence Social Relationship: family-peer relationships, 9.2.7. Vocational Choice: Factors influencing vocation choice: personal and social factors 9.2.8. Problems in adolescence: juvenile delinquency, drug abuse, school dropout, suicide	Lectures, problem-based learning, group discussions, PowerPoint presentations, student presentations, question–answer sessions	Case study presentation, Final examination	CLO4

PROVISIONAL

Course Code: 8223453	Marks: 100	Credits: 4	Class Hour:56
Course Title: Psychological Test and Measurement			

Course Description

This course introduces the theory and practice of psychological testing and psychometric assessment. It covers the nature, purpose, and applications of psychological tests, including intelligence, aptitude, personality, interest, and values assessments. Students will learn the principles of test construction, item writing, response design, data collection, item analysis, reliability, validity, and the development and interpretation of norms. The course emphasizes ethical test development and the practical application of psychometric methods in educational, clinical, organizational, and research settings.

Course Objectives

- Introduce the fundamental principles, theoretical frameworks, and classifications of psychological tests and psychometric questionnaires.
- Develop practical competence in test construction, including item writing, response formatting, pilot testing, and item analysis.
- Impart statistical and methodological techniques to rigorously estimate and interpret the reliability and validity of assessment tools.
- Provide practical skills for standardizing test scores, establishing psychometric norms, and ethically applying testing principles across diverse professional settings.

Course Learning Outcomes (CLOs)

After going through the course, students will be able to learn the following outcomes:

CLO	Course Learning Outcomes (CLOs)	Bloom's Level	PLO
CLO1	Explain concepts, purposes, types, and applications of psychological tests and psychometric questionnaires	Understand (C2)	PLO1, PLO9
CLO2	Develop psychological test items and conduct pilot testing, data collection, and item analysis using standard psychometric techniques	Create (C6) / Apply (C3)	PLO3, PLO4, PLO5, PLO7, PLO12
CLO3	Evaluate reliability and validity of psychological tests using appropriate statistical and psychometric methods	Evaluate (C5)	PLO3, PLO4, PLO5, PLO9, PLO11
CLO4	Interpret test scores and norms to make informed decisions and apply psychological tests in educational, clinical, organizational, and research contexts	Apply (C3) / Analyze (C4)	PLO2, PLO6, PLO8, PLO9, PLO10, PLO11, PLO12
CLO5	Ensure ethical standard in using psychological tests	Affective: Characterization (A5) / Valuing (A3)	PLO2, PLO4, PLO5, PLO8

PROVISIONAL

Course Contents

Week	Topics	Teaching-Learning Strategies	Assessment Strategy	CLOs
1-3	**1. Nature and use of psychological test:** 1.1 Definition of psychological tests and testing 1.2. Current uses of psychological test 1.3. Tests versus questionnaires 1.4. Types of psychological tests: 1.4.1. Tests of Attainment 1.4.2. Test of General Intelligence 1.4.3 Test of Special Ability and Aptitude 1.4.4. Test Batteries 1.4.5. Types of Questionnaires: Personality Questionnaires, Interest Questionnaires, Values Questionnaires	Interactive lectures, multimedia presentations, classroom discussions, case studies, demonstrations of psychological tests, question–answer sessions	Class participation, Objective quiz	CLO1
4-6	2. **Designing and writing Items:** 2.1. Empirical, Theoretical and Rational approaches to item construction 2.2. Guiding rules for item construction- literature search, subject matter experts, etc., number of items	Lectures, workshops on item writing, group exercises, collaborative learning, peer review, practical assignments	Item writing assignment, Peer evaluation	CLO2
7-8	3. **Designing and scoring responses:** Open-ended response, Closed ended response	Demonstration, hands-on practice, classroom exercises, problem-solving activities, guided discussions	In-class exercise, Scoring rubric task	CLO2
9-11	4. **Collecting Data:** 4.1. Sample size determination 4.2. Pilot testing of items 4.3. Field testing 4.4. Cognitive reviewing	Lectures, field exercises, pilot testing activities, practical demonstrations, group projects, supervised data collection	Field activity report, Project milestone review	CLO2

PROVISIONAL

12-15	5. **Analyzing Items:** 5.1. Item Difficulty Index, 5.2. Item Endorsement Index 5.3. Item Discrimination: Item Discrimination Index, Upper Lower Index (ULI), Item Discrimination Coefficient	Interactive lectures, numerical problem-solving, computer-based practice (SPSS/Excel), workshops, case analysis	Practical problem sets, Midterm examination	CLO3
16-19	6. **Assessing Reliability:** 6.1. Defining reliability 6.2. Test-Retest Reliability 6.3. Alternative Forms Reliability 6.4. Internal Consistency Reliability (Split-half, Kuder-Richardson, Cronback Alfa)	Lectures, worked examples, statistical exercises, computer laboratory sessions (SPSS/R), group discussions, assignments	Lab assignment (SPSS/R), Reliability computation test	CLO3
20-23	7. **Assessing Validity:** 7.1. Defining Validity 7.2. Aspects of Validity: Face Validity, Content Related evidence for validity, Criterion Related evidence for validity, Construct Related evidence for validity, Relationship between Reliability and validity	Interactive lectures, case studies, journal article review, group presentations, classroom discussions, problem-based learning	Article critique presentation, Written quiz	CLO3
24-26	8. **Norms and the Meaning of test scores:** Statistical concepts, Developmental norms, Within group norms, Relativity of norms	Lectures, practical exercises on score interpretation, statistical analysis, case studies, seminars, student presentations	Case report on score interpretation	CLO4
27-28	**9. Ethical Issues in Psychological Testing**	Lectures, classroom discussions, student presentations	Objective quiz, Final examination	CLO5

Course Title: Social Psychology			

Course Description

This course introduces the fundamental concepts, theories, and applications of Social Psychology, focusing on how individuals' thoughts, feelings, and behaviors are influenced by social interactions and cultural contexts. It covers key topics including socialization, social perception, attitudes, group behavior, communication, interpersonal attraction, leadership, and mass communication. Students will examine social psychological processes through theoretical perspectives, research methods, and real-life applications to develop analytical, communication, and problem-solving skills for understanding individual and group behavior in society.

Course Objectives

- Introduce core theories, foundational concepts, and empirical research methods of social psychology.
- Examine the mechanisms of socialization, social cognition, and attitude formation and change.
- Analyze group dynamics, interpersonal attraction, leadership styles, and communication processes across diverse settings.
- Investigate mass communication and collective behavior to address social challenges using ethical, evidence-based practices.

Course Learning Outcomes (CLOs)

After going through the course, students will be able to learn the following outcomes:

CLO	Course Learning Outcomes (CLOs)	Bloom's Level	PLO
CLO1	Explain the fundamental concepts, theories, research methods, and processes of social psychology, including socialization, social perception, and attitude formation	Understand (C2)	PLO1, PLO4, PLO9

Course Code: 8223456	Marks: 100	Credits: 4	Class Hour: 56
Course Title: Practical: Experimentation			
Marks Distribution	**Laboratory Note Book = 10** **Conduction = 20** **Report/Script = 50** **Viva = 20**		

Course Description

This laboratory course introduces students to the fundamental methods and techniques of experimental psychology through a series of practical experiments. It provides hands-on experience in designing, conducting, recording, analyzing, and interpreting psychological experiments related to perception, learning, memory, motivation, problem solving, sensory processes, and cognitive functioning. Students gain practical knowledge of psychological measurement, data collection, and scientific reporting while developing skills in observation, critical thinking, ethical research practices, and statistical interpretation. The course bridges theoretical concepts with practical application, enabling students to understand human behavior through empirical investigation and prepare for advanced study and research in psychology.

Course Objectives

- Provide hands-on laboratory experience in conducting classical experimental psychology experiments across sensation, perception, memory, and cognitive processes.
- Train students in precise psychophysical and behavioral measurement methods, data recording, and rigorous threshold determination.
- Develop empirical analytical skills to evaluate human performance, cognitive sets, sensory limitations, and interference phenomena.
- Foster ethical research conduct, accurate laboratory notebook maintenance, and standard scientific report writing.

Course Contents
[Any 6 of the following 10 experiments to be conducted]

Serial Number	Name of Experiment	Teaching-Learning Strategies	CLOs
1	To study the effect of set on problem solving behaviors.	Interactive lecture, demonstration; group problem-solving activities; supervised experiment; class discussion and interpretation of results.	CLO1
2	To study the effect of Knowledge of results on level of aspiration.	Interactive lectures, demonstration, conduct the experiment individually; analyze scores; discussion and interpretation of scores	CLO1
3	To study the effect of proactive inhibition on paired associate learning	Introductory lecture; demonstration; hands-on experimentation; compare recall performance; discuss the effects of interference.	CLO1
4	To investigate the phenomenon of Muller-Lyer illusion.	Interactive lectures, demonstration, observe and record judgments; discuss perceptual errors and influencing factors.	CLO2
5	To study the associative reaction time under free versus controlled situation.	Explain reaction time and cognitive processing; demonstrate the apparatus/procedure; conduct individual trials; compare reaction times; interpret findings through class discussion.	CLO2
6	To measure DL for lifted weights by the method of limit.	Introduce psychophysics and Weber's law; demonstrate the method of limits; provide hands-on practice with weights; calculate DL; discuss sensory discrimination.	CLO2
7	To study two-point tactual discrimination by the methods of limit.	Explain tactile sensation and sensory receptors; demonstrate the use of an aesthesiometer; conduct paired practical work; record thresholds; discuss variations across body regions.	CLO3
8	To study von-Restorff effect on serial learning.	Explain memory and distinctiveness; present serial learning tasks; conduct recall activities; analyze results; discuss the isolation effect and its educational implications.	CLO3

PROVISIONAL

9	To study the Zeigarnik effect.	Brief lecture and concept clarification, perform interrupted and completed tasks; compare recall performance; encourage reflective discussion on the findings.	CLO4
10	To Study the effect of over learning on retention.	Explain learning, practice, and retention; demonstrate overlearning procedures; conduct retention tests after practice; compare results; discuss applications in education and skill acquisition.	CLO5

Assessment and Evaluation Strategy:

1. Formative or Continuous Assessment 20
   - Demonstration – 5
   - Classroom Experiment Conduction – 5
   - Report Writing – 10
2. Summative or Final Assessment 80
   - Conduction – 20
   - Report Writing – 35
   - Viva – 25

Course Title: Sociology of Bangladesh			

Course Description

Sociology of Bangladesh offers a comprehensive exploration of the structural foundations, cultural diversity, and dynamic transformations of Bangladeshi society. Designed to bridge academic theory with everyday reality, the course examines how ecological factors, colonial legacies, and the 1971 Liberation War have shaped the nation's social institutions. Students will critically analyze rural and urban class structures, changing family dynamics, economic shifts driven by the RMG sector and remittances, and the rich tapestry of ethnic coexistence. Through the lens of foundational sociological theories, the curriculum addresses contemporary challenges—including gender inequality, poverty, and climate change vulnerability—empowering students to collaborate effectively and relate sociological insights to national development and real-world issues.

Course Objectives

After successful completion of this course, students will be able to:

- Develop an understanding of the major features, concepts, and characteristics of Bangladeshi society, including its social, cultural, economic, and political conditions.
- Explain the historical development of Bangladesh society, including the impacts of ecological factors, colonial experiences, the Language Movement, and the Liberation War.
- Understand the structure and functions of major social institutions, including family, culture, education, economy, politics, and governance systems in Bangladesh.
- Analyze contemporary social issues of Bangladesh, including inequality, poverty, gender issues, migration, urbanization, and climate change vulnerability from a sociological perspective.
- Apply basic sociological concepts and theories to understand social problems and social transformation processes in Bangladeshi society.
- Develop awareness of cultural diversity, ethnic coexistence, and changing patterns of identity within Bangladesh.
- Relate sociological knowledge to everyday life, national development, and real-world social challenges.
- Develop collaborative learning skills through discussion, case studies, presentations, and analysis of social issues in Bangladesh.

PROVISIONAL

Course Learning Outcomes (CLOs)
After going through the course, students will be able to learn the following out comes

CLO	Course Learning Outcomes (CLOs)	Bloom's Level	PLOs
CLO1	Appreciate the importance of cultural diversity and ethnic coexistence in Bangladesh.	Affective: Valuing (A3) / Understand (C2)	PLO1,PLO2, PLO6,PLO7, PLO8,PLO10, PLO12
CLO2	Analyze several changing social issues of Bangladesh from sociological perspective.	Analyze (C4)	PLO1, PLO2, PLO3, PLO4, PLO5, PLO6, PLO10,PLO11, PLO12
CLO3	Explain the basic concepts, institutions and characteristics of society of Bangladesh.	Understand (C2)	PLO1, PLO2, PLO6, PLO7, PLO10, PLO11
CLO4	Apply fundamental sociological theories to be informed about social problems in Bangladesh.	Apply (C3) / Analyze (C4)	PLO1, PLO2, PLO3, PLO4, PLO5, PLO6, PLO8, PLO10, PLO12
CLO5	Illustrate the historical evolution, social background, family system, not only economy but also political system of Bangladesh.	Understand (C2) / Analyze (C4)	PLO1, PLO2, PLO6, PLO7, PLO10,PLO11, PLO12
CLO6	Collaborate with peers sociological ideas effectively for Bangladeshi society.	Apply (C3) / Affective: Responding (A2)	PLO2, PLO3, PLO6, PLO9, PLO10, PLO12

Course Title: Bangladesh Society and Culture			

Course Descriptions

This course provides a comprehensive sociological and anthropological analysis of Bangladesh society and culture. Students will explore the historical evolution, social structures, cultural patterns, and contemporary transformations of the country.

Course Objectives

1. To provide students with a comprehensive understanding of the historical, social, and cultural evolution of Bangladesh from ancient Bengal to the post-independence era.
2. To analyze the core social structures, institutions, and forms of stratification, including class, gender, caste, and power relations in rural and urban settings.
3. To explore the pluralistic nature of Bangladeshi culture, covering religious traditions, secular celebrations, folk philosophies, and diverse artistic expressions.
4. To examine the socio-economic challenges and cultural dynamics of ethnic minorities and marginalized communities within Bangladesh.
5. To critical evaluate the impacts of globalization, urbanization, climate change, and economic transformations on contemporary Bangladeshi society.

Course Learning Outcomes (CLOs)

CLO	Course Learning Outcomes (CLOs)	Bloom's Level	PLO

Course Title: Political Organization and the Political System of UK and USA			

Course Description

The course provides a concise understanding of political organization, constitutional principles, forms of government, and major organs of government. It examines democracy, dictatorship, parliamentary, presidential, unitary, and federal systems, along with the separation of powers, political parties, pressure groups, and public opinion. Special emphasis is placed on the political systems of the United Kingdom and the United States, including their constitutions, legislatures, executives, judiciaries, electoral systems, and party structures, enabling students to develop a comparative understanding of their institutional frameworks and functioning.

Course Objectives

After completing this course, students will be able to:

1. Develop a fundamental understanding of the concepts, significance, classification, and principles of constitutions and constitutional systems.
2. Explain and analyze different forms of government, including democracy, dictatorship, parliamentary, presidential, unitary, and federal systems.
3. Understand the theory of separation of powers and analyze the roles and functions of major organs of government, including the legislature, executive, judiciary, and electorate.
4. Develop knowledge of political behavior by examining the roles of political parties, pressure groups, and public opinion in political systems.
5. Analyze the constitutional structures, institutions, and operational mechanisms of the British political system, including the monarchy, Parliament, Prime Minister, Cabinet, and party system.
6. Analyze the constitutional framework and institutional features of the American political system, including checks and balances, the President, Congress, judiciary, and political parties.
7. Develop comparative analysis, critical thinking, communication, and teamwork skills through discussions, debates, presentations, and comparative studies of political systems.

Course Code: 8221759	Marks: 100	Credits: 4	Class Hours:56
Course Title: Bangladesh Philosophy			

Course Description

This course provides an overview of the origin, development, nature, scope, and characteristics of Bangladesh Philosophy. It explores the historical background of Bengali philosophical thought and its relationship with Western philosophy, including the influence of European and American ideas. The course covers ancient Bengali philosophical traditions through the contributions of thinkers such as Shantideva, Kamalashila, Shantarakshita, and Atisha Dipankara. It also examines medieval philosophical movements, including Islamic philosophy in Bengal, Baul philosophy, and Vaishnava philosophy. Furthermore, the course discusses nineteenth and twentieth-century Bengali philosophical thought through the works of Raja Rammohan Roy, Debendranath Tagore, Akshay Kumar Datta, Ishwar Chandra Vidyasagar, Keshab Chandra Sen, Rabindranath Tagore, Kazi Nazrul Islam, Muhammad Barkatullah, Abul Hossain, Kazi Abdul Wadud, Abul Fazal, Dr. G.C. Dev, Begum Rokeya, Ahmed Sharif, and Araj Ali Matubbar. Emphasis is placed on humanism, rationalism, national consciousness, identity, and the evolution of philosophical ideas in Bangladesh.

Course Objectives

- **Provide a Foundational Overview:** Introduce students to the origin, nature, scope, and distinctive characteristics of Bangladesh Philosophy within its socio-cultural and historical contexts.
- **Trace Chronological Evolution:** Explore the transition of philosophical thought in Bengal across ancient Buddhist scholarship, medieval syncretism (Sufi/Islamic, Baul, Vaishnava), and modern movements.
- **Analyze Comparative Dimensions:** Examine the intellectual dialogue and cross-currents between Bengali philosophical thought and Western (European and American) traditions.
- **Evaluate Modern Thinkers and Reform Movements:** Critically assess the contributions of key nineteenth and twentieth-century thinkers toward humanism, secularism, rationalism, gender discourse, and national identity.
- **Cultivate Critical Enquiry:** Enable students to connect historical philosophical frameworks with contemporary issues of ethics, national consciousness, and societal progress in Bangladesh.

Course Code: 8223257	Marks: 100	Credits: 4	Class Hours: 56
Course Title: Geography of Landforms			

Course Description

This course introduces the scientific principles of geomorphology, focusing on the origin, evolution, and spatial distribution of landforms and the geomorphic processes that shape the Earth's surface. It examines the interactions between endogenic and exogenic processes, including tectonism, weathering, mass movement, fluvial, aeolian, glacial, periglacial, coastal, and karst processes. The course also explores major geomorphological theories, landscape evolution models, palaeo-geomorphology, and contemporary approaches to geomorphic analysis. Particular emphasis is placed on the geomorphology of Bangladesh, including its physiographic evolution, river systems, deltaic and coastal environments, and geomorphic hazards. Through case studies, maps, diagrams, satellite imagery, and field-based interpretation, students will apply geomorphological concepts to environmental management, hazard assessment, land-use planning, and sustainable development.

Course Objectives

Upon completion of the course, students will be able to:

1. Develop a comprehensive understanding of the fundamental concepts, principles, methods, theories, and approaches of geomorphology and landscape evolution.
2. Analyze the processes and interactions of endogenic and exogenic forces, including tectonism, weathering, mass wasting, fluvial, aeolian, glacial, coastal, periglacial, and karst processes, in shaping landforms.
3. Interpret and evaluate major geomorphological theories, models, landforms, and geomorphic environments using maps, diagrams, satellite imagery, case studies, and palaeo-geomorphological evidence.
4. Apply geomorphological knowledge and analytical techniques to understand Bangladesh's physiography, river and deltaic systems, coastal environments, and geomorphic hazards, with emphasis on environmental management, land-use planning, and sustainable development.

Course Learning Outcomes (CLOs)

CLO	Course Learning Outcomes (CLOs)	Bloom's Level	PLO
CLO1	Explain the fundamental concepts, scope, principles, methods, and evolution of geomorphology, including major geographic features and process, geomorphological theories and geomorphic systems.	Understand (C2)	PLO1, PLO2, PLO6, PLO8
CLO2	Analyze the role of endogenic and exogenic processes, geomorphological structures, tectonic activities, weathering, and mass wasting in landform development and landscape evolution.	Analyze (C4)	PLO1, PLO2, PLO3, PLO5, PLO9

PROVISIONAL

CLO3	Interpret the geomorphic processes, characteristics, and landforms associated with fluvial, arid, glacial, periglacial, coastal, and karst environments.	Analyze (C4)	PLO1, PLO2, PLO3, PLO5, PLO6
CLO4	Analyze major geomorphological theories, models, and approaches, including those of William Morris Davis, Walther Penck, L. C. King, morphoclimatic concepts, and palaeo-geomorphic reconstruction.	Analyze (C4)	PLO1, PLO2, PLO3, PLO4, PLO6, PLO8
CLO5	Examine the geomorphology of Bangladesh and the relationships among landforms, geomorphic hazards and disasters, human settlements, environmental management, and sustainable development.	Analyze (C4)	PLO1, PLO2, PLO3, PLO4, PLO5, PLO6, PLO8, PLO9, PLO12
CLO6	Apply geomorphological concepts and techniques, including maps, diagrams, satellite imagery, and geomorphic interpretation, to analyze geographical and environmental problems.	Apply (C3)	PLO1, PLO2, PLO3, PLO4, PLO5, PLO6, PLO7, PLO9
CLO7	Demonstrate teamwork, scientific communication, critical thinking, and problem-solving skills through geomorphic interpretation, field observations, case studies, and collaborative learning activities.	Apply (C3) / Affective: Responding (A2)	PLO6, PLO7, PLO8, PLO9, PLO10, PLO11, PLO12

Course Contents

Week	Contents	Teaching–Learning Strategies	Assessment Methods	CLOs
1-2	**Introduction to Geomorphology:** Definition, concepts,scope, nature, methods of geomorphological explanation; form, processes and patterns; applications of geomorphology in environmental studies.	Interactive lecture (PPT), concept mapping, group discussion	Class participation, short quiz, concept map assignment and discussion assignment	CLO1
3-5	**Development of Geomorphological Thoughts and Modern Approaches:** Historical development; Uniformitarianism and Catastrophism; Davisian Cycle of Erosion; Penck's Slope Development Theory; King's Pediplanation Theory; Morphometric and Morphoclimatic concepts; contemporary geomorphic	Multimedia lecture, Video Clip Presentation, comparative model analysis, timeline	Quiz, group presentation, comparative theory assignment, written examination	CLO1 CLO4

PROVISIONAL

	approaches and impact of climate change on geomorphic processes.	activity, group discussion		
6-7	**Palaeo-geomorphology: P**rinciples of palaeo-geomorphic interpretation; methods of landscape reconstruction; applications in understanding past environmental changes and landscape evolution.	Lecture, geological time scale demonstration, landscape reconstruction exercise, case study discussion	Short assignment, reconstruction exercise, class test, case study report	CLO4
8-10	**Geomorphological Processes and Landforms:** Endogenic Process and landforms; Exogenetic Process and landforms	Diagram demonstration, Multimedia lectures, case study discussion, process-based interpretation	Laboratory exercise, class test, case study report, diagram interpretation assignment	CLO2
11-12	**Geomorphic Environment and its Classification**	concept mapping, environmental classification exercise, thematic map interpretation	Short quiz, classification exercise, concept map assignment, map interpretation,	CLO2 CLO3
13-15	**The Humid Geomorphic Environment:** Characteristics of humid environments; fluvial processes; origin and evolution of rills, gullies and drainage patterns; channel types; erosion, transportation and deposition; stream flow, velocity and discharge	Video demonstration, problem-solving exercise, group presentation, hydrograph interpretation	Problem-solving assignment, presentation, hydrograph analysis, midterm examination	CLO2 CLO6
16-17	**The Arid and Semi-arid Geomorphic Environment:** Characteristics of arid and semi-arid environments; wind action and aeolian processes; erosional and depositional aeolian landforms.	Case study, map interpretation, image analysis, class discussion	Case study report, map interpretation exercise, quiz, landform identification assignment	CLO3 CLO6
18-19	**The Glacial and Periglacial Geomorphic Environment:** Characteristics of glacial and periglacial environments; glacial processes and products; erosional and depositional	Multimedia lecture, landform identification exercise,	Practical exercise, assignment, oral presentation,	CLO3

PROVISIONAL

	glacial landforms; periglacial processes and features.	image interpretation, collaborative learning	image interpretation test	
20-21	**Karst Topography:** Conditions for karst development; karst processes; solution and deposition processes; surface and subsurface karst landforms; caves, sinkholes, limestone pavements and other karst features.	Multimedia lecture, diagram demonstration, landform identification exercise, case study discussion	Karst feature identification exercise, assignment, class test, practical interpretation	CLO3
22-24	**Coastal Geomorphic Environment:** Coastal classification and shoreline delineation; coastal geomorphic processes and products; waves, tides, winds and ocean currents; erosional and depositional coastal landforms; coral environments; delta formation, classification, types and structures; coastal landscape evolution.	Satellite image interpretation, coastal case studies, collaborative learning, map analysis	GIS/map interpretation assignment, group presentation, class test, coastal case study report	CLO3 CLO4
25-28	**Geomorphology of Bangladesh:** Geomorphological evolution of Bangladesh; quaternary geology and sedimentary sequences; physiographic regions; river dynamics; coastal and deltaic geomorphology; geomorphology and human settlement	Bangladesh case studies, field-based examples, seminar presentation	Seminar presentation, field report, using GIS & Rs, case study assignment, final examination	CLO5 CLO6 CLO7

PROVISIONAL

Course Code: 8223157	Marks: 100	Credits: 4	Class Hours: 56
Course Title: Chordates, Evolutionary and Applied Zoology			Exam Duration: 4 Hours

Course Description

This course provides an integrated understanding of chordate diversity, comparative anatomy, evolution, palaeontology, zoogeography, ecology, genetics, animal breeding, and applied zoology. It emphasizes taxonomic classification, structural and functional adaptations, biodiversity and conservation, genetic principles, breeding techniques, and the applications of zoological knowledge in fisheries, poultry, agriculture, and sustainable resource management.

Course Objectives

To provide students with a comprehensive understanding of chordate diversity, comparative anatomy, and evolutionary biology, alongside foundational knowledge in palaeontology, zoogeography, ecology, genetics, and applied zoology. This course aims to develop taxonomic expertise, analytical skills in animal breeding and genetics, and practical awareness of conservation, fisheries, poultry, and pest management relevant to Bangladesh's socio-economic and environmental context.

Course Learning Outcomes (CLOs)

CLO	Course Learning Outcomes (CLOs)	Bloom's Level	PLO
CLO1	Classify chordate taxa (Chondrichthyes to Mammalia) up to the order level by applying diagnostic morphological characteristics, and evaluate the evolutionary significance of transitional groups through palaeontological evidence.	Analyze (C4) / Evaluate (C5)	PLO1,PLO2, PLO4,PLO5, PLO10, PLO12
CLO2	Compare and contrast the organ systems (skeletal, digestive, circulatory, respiratory, excretory, nervous, reproductive, and endocrine) across 9 type study organisms (Ascidia* to Cavia) to explain anatomical adaptations to diverse habitats and modes of life.	Understand (C2) / Analyze (C4)	PLO1,PLO2, PLO4,PLO5, PLO10, PLO12
CLO3	Analyze zoogeographical regions of the world, marine ecological zonations, and biodiversity concepts to assess conservation challenges and sustainable management of natural resources.	Analyze (C4) / Evaluate (C5)	PLO1,PLO2, PLO3,PLO4, PLO6,PLO7, PLO8, PLO10, PLO12
CLO4	Apply principles of Mendelian genetics, multiple alleles, mutations, and chromosomal sex determination to solve inheritance problems and explain animal breeding strategies.	Apply (C3)	PLO1,PLO2, PLO3,PLO4, PLO5, PLO12
CLO5	Evaluate the principles and practices of applied zoology—including agricultural pest management, integrated fish farming, and poultry farming—and	Evaluate (C5) / Create (C6)	PLO1,PLO2, PLO3,PLO4, PLO6,PLO7, PLO8,PLO9,

PROVISIONAL

	propose solutions for enhancing productivity and socio-economic conditions in Bangladesh.		PLO10,PLO11, PLO12

Course Contents

Week	Topic	Teaching Learning Strategy	Assessment Strategy	CLOs
1-14	**<u>Group – A:</u> Chordates: (50 Marks)** 1. Broad classification of the following up to order with general and diagnostic characteristics of each taxonomic category with examples (preferably local) and affinities- Chondriththyes, Osteichthyes, Amphibia, Reptilia, Aves and Mammalia. 2. Type study of the following with their systematic position, habitats, distribution, external morphology, anatomy including skeletal, digestive, circulatory, respiratory, excretory, nervous, reproductive and endocrine systems; food & feeding habits and mode of life - *a.* Urachordata : *Ascidia* *b.* Cephalochordata : *Branchiostoma* *c.* Cephalaspimorpha: *Petromyzon* *d.* Chondrichthyes : *Scoliodon* *e.* Osteichthyes : *Labeo rohita* *f.* Amphibia : *Bufo* *g.* Reptilia : *Hemidactylus* *h.* Aves : *Columba livia* *i.* Mammalia : *Cavia porcellus.*	Lectures and Group discussions Fossil Timeline Jigsaw Virtual Dissection Lab Organ System Expert Jigsaw	Class test, specimen-based identification, comparative anatomy assignment, virtual dissection activity, group presentation, written examination	CLO1 CLO2

PROVISIONAL

15-28	**<u>Group – B</u> (50 Marks)** **Palaeontology, Zoogeography, Ecology,** **Genetics & Animal Breeding and Applied Zoology:** **Palaeontology:** Geologocal time table; extinction events of Mesozoic reptiles and dinosaurs; palaeontological history of Horse & Man; microfossil types and their structures. **Zoogeography:** Zoogeographical regions and sub-regions of the world, their boundaries, physical characteristics, climatic conditions, flora and fauna. **Ecology:** Marine ecology; Zonation and Animal Adaptation to Different Zonations; Concept of Biodiversity; Concept and Classification of Resources; Conservation of Natural Resources; Renewable and Non-Renewable Resources. **Animal Genetics:** Laws of inheritance, gene interactions and frequency, genotype frequency, Hardy-Weinberg Law, Mutation, genetic drift, Continuous variation, heritability, and repeatability of traits. **Animal Breeding:** Pedigree, progeny testing; Inbreeding, outbreeding, crossbreeding, and grading up; Selection response, selection index, and breeding value estimation (EBV); Marker-assisted selection and genomic selection in livestock. **Applied Zoology:** 1. **Major Branches:** Entomology, Fisheries, Wildlife Biology, Parasitology and others. 2. **Agricultural Pests:** Major Pests of Rice, Jute, Sugarcane & stored grain.	Lecture, Group Discussion, Assignments and tutorial sessions Zoogeographical Mapping Marine Zonation Poster Punnett Square Problem-Solving Mutation Case Studies Integrated Farming System Design Pest Identification & Management Plans	Quiz, map-based assessment, case-study analysis, problem-solving exercises, assignment, group presentation, farming-system design, pest-management plan, class test and written examination	CLO3 CLO4 CLO5

PROVISIONAL

	3. **Integrated Fish Farming:** Types; Poultry, Livestock and Paddy-cum -Fish Culture. 4. **Poultry farming:** System of poultry farming, diseases management, economic impacts.
