NATIONAL UNIVERSITY BANGLADESH

Syllabus
Bachelor of Science (Honours) Second Year
Department of Home Economics

Effective from the Academic Year: 2024–2025 and onward

Vision of the University

To promote “Progress for Everyone” by fostering transformative education, conducting pioneering research, and encouraging meaningful collaboration with individuals, communities, and partners both in Bangladesh and around the world.

Mission of the University

We expect that on the hundredth anniversary of the National University, our commitment to “Progress for Everyone” will be evident in all areas of our operations and stakeholder engagements.

We leverage our core strength in education, research, and community engagement to address pressing global issues and foster sustainable development.

By 2042, National University aims to strengthen its positions as Bangladesh’s top academic institution and rank among the world’s leading universities. Our focus will be on expanding expertise building strategic partnerships, and increasing our global influence. Our services will be measured by the achievements of the individuals and communities we serve.

Name of the Program: B.Sc. (Honours) in Home Economics

Vision of the Department

The Bachelor of Social Science (Honours) in Economics is structured as a nationally acknowledged and globally connected undergraduate curriculum promoting "Progress for Everyone”. The program aims to produce graduates who possess economic acumen, analytical proficiency, ethical accountability, and social consciousness, enabling them to assess and address complex economic challenges. It aims to foster inclusive growth, efficient public policy, social equity, and sustainable development in Bangladesh and abroad through exceptional teaching, research, quantitative analysis, and community involvement. By the year 2042, the initiative aims to enhance its educational standards, research influence, technical proficiency, and strategic partnerships, while preparing graduates with the necessary skills for success in professional careers, leadership roles, entrepreneurship, and advanced studies. The evaluation of its performance will focus on the advantageous, quantifiable influence its alumni exert on individuals, organizations, communities, and the broader economy.

Mission of the Department

The mission of the Bachelor of Social Science (Honours) in Economics is to deliver a transformative, inclusive, and research-based education grounded in economic principles, quantitative methods, critical analysis, and practical application. Learners will comprehend how individuals, businesses, institutions, and governments make decisions in the face of scarcity and assess the economic and social ramifications of those decisions. It prepares the graduate to formulate and implement economic models, scrutinize intricate data, evaluate many alternatives, convey results to diverse

audiences, and make decisions grounded on facts. The curriculum cultivates ethically minded and socially accountable graduates for professions in public policy, finance, market research, data analysis, consulting, management, and entrepreneurship via interdisciplinary education, cooperative research, community involvement, digital skills, and both national and global collaborations. It also establishes a robust foundation for advanced education while empowering graduates to promote inclusive prosperity, institutional efficacy, and sustainable development in Bangladesh and elsewhere.

Program Educational Objectives (PEOs)

PEO 1: To equip graduates with comprehensive knowledge and practical skills in core areas of Home Economics including food and nutrition, clothing and textiles, child development, resource management, art and creative studies, and family relation enabling them to become competent and competitive professionals.

PEO 2: To apply innovative and effective teaching-learning strategies through a combination of theoretical knowledge, practical exercises, fieldwork, and apprenticeships that support holistic student development.

PEO 3: To foster in students the motivation, critical thinking, and problem-solving abilities necessary to address complex and emerging societal issues with creativity and responsibility.

PEO 4: To promote a research-oriented mindset by engaging students in relevant and impactful research that contributes to peace, development, and societal well-being at both national and international levels.

PEO 5: To create opportunities for students and faculty to engage in meaningful academic and professional programs individually and collaboratively with reputed institutions and organizations in relevant fields.

Program Learning Outcomes (PLOs)

At the time of graduation, B.Sc. (Honours) in Home Economics students will have achieved the ability to:

PLO 1: Knowledge Mastery: Demonstrate broad and in-depth knowledge in core and interdisciplinary areas of Home Economics including food and nutrition, clothing and textiles, child development, family relations, resource management, and creative arts.

PLO 2: Practical Competence: Apply technical and hands-on skills acquired through practical classes, field exercises, and apprenticeships in professional contexts.

PLO 3: Critical Thinking: Analyze complex and emerging problems related to families, individuals, and communities using logical and evidence-based reasoning.

PLO 4: Research Ability: Design, conduct, and interpret research in relevant areas of

Home Economics that contribute to societal transformation and knowledge advancement.

PLO 5: Institutional Collaboration: Participate in collaborative educational or research programs with national and international organizations or institutions in relevant fields.

PLO 6: Communication Skills: Communicate clearly and effectively in academic, professional, and community settings using appropriate oral, written, and visual forms.

PLO 7: Problem Solving: Generate creative and practical solutions to real-world issues affecting individuals and families using interdisciplinary knowledge.

PLO 8: Ethical Reasoning: Demonstrate ethical awareness and socially responsible behavior in decision-making, research, and community work.

PLO 9: Leadership and Initiative: Exhibit leadership and initiative while working independently or collaboratively in educational and professional environments.

PLO 10: Lifelong Learning: Recognize the importance of lifelong learning and actively seek opportunities for self-improvement and skill enhancement.

PLO 11: Civic Engagement: Engage in programs or activities that address social, cultural, or developmental challenges with the intent to improve community well-being.

PLO 12: Digital and Information Literacy: Utilize appropriate digital tools and information resources for academic, research, and professional purposes.

Detailed Syllabus

Course Code: 8223551	**Marks:** 100	**Credits:** 4	**Class Hours: 56**
Course Title: Food Science and Technology		**Course Type:** Core	**Exam Hours:** 4

Course Description

This course provides fundamental knowledge of food components, food deterioration, processing, preservation, and quality control. It covers thermal and non-thermal preservation techniques, processing of milk, meat, seafood, cereals, fruits, vegetables, fats, oils, beverages, and indigenous food preservation methods to ensure food safety, nutrition, and extended shelf life.

Course Objectives

- This course covers knowledge of food-processing and preservation methods and the choice of a technique concerning food types.
- It overviews various conventional thermal and non-thermal food processing methods.
- It also overviews various types of preservation methods available and to maximize the nutritive value of foods with safety, quality, and shelf life.

Course Learning Outcomes (CLOs)

CLO Code	Course Learning Objectives
CLO 1	Identify the primary constituents of food and explain the factors that lead to food deterioration and spoilage.
CLO 2	Evaluate different preservation techniques, including heat (canning), cold (refrigeration/freezing), and dehydration.
CLO 3	Describe the industrial processing methods for major commodities like milk, meat, poultry, and seafood.
CLO 4	Analyze the production and quality control processes for fats, oils, and their secondary products like margarine and mayonnaise.
CLO 5	Explain the milling and baking processes of cereals and the post-harvest handling of fruits and vegetables.
CLO 6	Identity the significance of indigenous food preservation techniques in Bangladesh and their impact on public health.

Detailed Syllabus

Course Code: 8223553	**Marks:** 100	**Credits:** 4	**Class Hours:** 56
Course Title: Family Resource Management		**Course Type:** Core	**Exam Hours**:4

Course Description

This course introduces the principles and practices of effective family resource management. It focuses on resource utilization, decision-making, time and energy management, household work simplification, ergonomics, budgeting, financial planning, consumer education, and sustainable management practices for improving family well-being.

Course Objectives

- The course is designed to provide students with a comprehensive understanding of the concepts, principles and practices of family resource management.
- It aims to develop competencies in the effective planning, utilization and conservation of family resources through decision-making, time and energy management, household activity analysis, work simplification, income management, budgeting and financial planning.
- The course further enhances students' ability to apply ergonomic and quality management principles for improving household efficiency, promoting sustainable resource utilization, strengthening financial responsibility and consumer awareness, and contributing to the well-being of individuals, families and society.

Course Learning Outcomes (CLOs)

CLO Code	Course Learning Outcome
CLO-1	Explain the concepts, principles, components, and sustainable utilization of family resources for effective family resource management.
CLO-2	Analyze time, energy, and household activities by considering factors affecting resource utilization, ergonomics, fatigue, and work efficiency in family management.
CLO-3	Apply principles of body mechanics, work simplification, motion economy, and ergonomic approaches to improve household work performance, safety, and productivity.
CLO-4	Evaluate family resource management decisions related to income utilization, budgeting, financial planning, consumer education, and resource allocation for achieving family well-being.
CLO-5	Demonstrate skills in planning, organizing, implementing, and monitoring family resource management practices using appropriate managerial processes and digital financial tools.
CLO-6	Demonstrate ethical values, responsible decision-making, and commitment to sustainability and continuous quality improvement in family resource management.

Detailed Syllabus

Course Code: 8223555	**Marks:** 100	**Credits**: 4	**Class Hours:** 56
Course Title: Principles of Family Clothing		**Course Type:** Core	**Exam Hours:** 4

Course Description

This course develops knowledge and skills related to family clothing selection, budgeting, wardrobe planning, consumer decision-making, children's clothing, clothing construction, care, and storage. It emphasizes economical, functional, and aesthetic clothing choices considering health, comfort, and family resource management.

Course Objectives

- The course aims to develop students' knowledge and skills in family clothing management.
- To understanding the factors influencing clothing selection, budgeting, wardrobe planning, Consumer decision-making, children's clothing, basic garment construction.
- Students can able to clothing care and proper storage.
- It also enables students to make economical, functional, and aesthetically appropriate clothing choices that promote health, comfort and efficient resource management for individual and families.

Course learning outcomes (CLOs)

CLO Code	Course Learning Outcome
CLO-1	Student can realize those factors. Involved in clothing of the family. They also can also be familiar with socio-economic and psychologiartisines, relations of clothing with health life cycle etc.
CLO-2	Students can be developed their knowledge about money management, total family clothing expenditure, budget making.
CLO-3	Understand the decision-making process about clothing selection of the family. They also realize the effecting factors related to decision making process-
CLO-4	Learner's will be able to plan a family' wardrobe based on needs and budged can They with apply art elements and principles in suitable Clothing, apply to special problems. They can explain the impact of clothing on personality and appearance.
CLO-5	Students will be able to identify the major consumer problem in family Clothing and explain how factors such as income, family side, individual differences, inflation motivation and unplanned shopping affect clothing decisions.
CLO-6	Students will be able to describe the principles of select selecting suitable clothing for children based on comfort, safety durability and ease of care.
CLO-7	Explain the principles of Clothing construction - including body measurement, patter drafting fabric cutting, material estimation. Apply these principles to Construct garments accurately and efficiently.
CLO-8	Describe the proper methods of laundering; stain removal, ironing and the use of washing agents. Apply approaches clothing care technique to maintain cleanliness and durability.
CLO-9	Explain the principles of proper clothing storage including brushing, airing and in seed

	protection Store garments correctly to preserve their quality hygiene and lifespan.

Detailed Syllabus

Course Code: 8223556	**Marks:** 100	**Credits:** 4	**Class Hours:** 56
Course Title: Practical: Food Science and Technology, Family Resource Management, Principles of Family Clothing)		**Course Type:** Core	**Exam Hours:** 6

Course Description

This practical course provides hands-on experience in applying theoretical knowledge through laboratory activities, household management exercises, budgeting practices, clothing construction, food processing, preservation techniques, and report preparation. It develops technical skills, analytical ability, and practical competence in Home Economics-related activities.

Course Objectives

- This laboratory course provides students with hands-on experience in the application of food preservation and processing technologies.
- It bridges the gap between theoretical food science and real-world production by focusing on the physical transformation of raw ingredients into shelf-stable products.
- Students will master domestic and industrial-scale techniques, ranging from thermal processing and dehydration to the biological process of fermentation.

Course Learning Outcomes (CLOs)

CLO Code	Course Learning Outcomes
CLO 1	Execute diverse food preservation methods (drying, freezing, frying, canning) while maintaining the nutritional and sensory quality of the food.
CLO 2	Formulate the fruit and vegetable-based products such as juices, pickles, jams, and jellies.
CLO 3	Apply the principles of bottling and canning to ensure commercial sterility and extended shelf life.
CLO 4	Perform controlled fermentation of milk and other food substrates to produce value-added products (e.g., yogurt, vinegar).
CLO 5	Evaluate the quality and safety of processed foods through basic sensory and physical testing.
CLO 6	Prepare time plans for individuals and families using Gantt charts and appropriate time management techniques to improve efficiency in household activities.
CLO 7	Compare time and energy management practices of homemakers, working women, and students to identify factors affecting efficient utilization of family resources.
CLO 8	Observe, analyze, and evaluate household work methods using principles of work simplification, ergonomics, and motion economy for improving work efficiency.
CLO 9	Demonstrate the ability to collect, organize, interpret data, and present practical findings through reports and presentations using appropriate analytical and communication skills.

CLO 10	Students can be developed their knowledge about money management, total family clothing expenditure, budget making.
CLO 11	Select the clothing of the family.
CLO 12	Students will be able to identify the major consumer problem in family Clothing and explain how factors such as income, family side, individual differences, inflation motivation and unplanned shopping affect clothing decisions.

10-11	Preparation and Evaluation of Time Plans using Gantt Charts.	Demonstration, Hands-on Practice, Feedback	CLO-6
12-13	Comparative Study of Time Planning between a Homemaker and a Working Woman.	Field Study, Observation, Presentation	CLO-7
14-15	Preparation of Students' Time Plans for Working Days and Holidays.	Practical Exercise, Self-Assessment, Discussion	CLO-6
16-17	Study of Household Work Methods through Observation.	Observation, Practical Exercise, Report Writing	CLO-8 CLO-9
18-19	Comparative Study of Energy Management Practices of Homemakers and Working Women with Presentation.	Field Study, Data Analysis, Presentation	CLO-7 CLO-8 CLO-9
20-21	Comparative Study of Expenditure Patterns of Different Types of Families with Presentation.	Survey, Data Analysis, Presentation	CLO-8 CLO-9
22-23	Preparation of a Monthly Family Budget and Analysis of Family Income and Expenditure Patterns.	Hands-on Practice, Case Study, Budget Analysis	CLO-8

Part C: Principles of Family Clothing

Course Objectives:

The course aims to develop students' knowledge and skills in family Clothing management by understanding the factors influencing clothing selection, budgeting, wardrobe planning, Consumer decision-making, children's clothing, basic garment construction. Clothing care and proper storage. It also enables students to make economical, functional, and aesthetically appropriate clothing choices that promote health, comfort and efficient resource management for individuals and families.

Course Contents

Week	Topic	Teaching Learning Strategy	CLO
24	Each student will summit five craft design objects	Demonstration, Hands-on Practice, Feedback	CLO-10
25	Make a clothing budget for one year for different family income group.	Observation, Presentation, Budget Analysis	CLO-11
26	Prepare a body measurement sheet for garments construction.	Practical Exercise, Self-Assessment, Discussion	CLO-10
27	Construct one set of garments for boys or girls considering their personal likes or dislikes.	Observation, Practical Exercise,	CLO-12 CLO-10
28	Removal of different types of stains from the cloth.	Hands-on Practice, Report Writing.	CLO-10 CLO-11 CLO-12

Course Assessment Framework

Total Course Marks: 100 Examination Duration: 6 Hours

Assessment Category	Assessment Component	Weightage
Formative Assessment	Attendance, Class Participation, Note Book, Practical Demonstration	20%
Summative Assessment	Final Examination Answer a total of **six** questions with **two** questions from each section/ part: 6X10=60 Three questions will be setup from each section	60%
Viva-voce	Viva-voce on practical works	20%

Detailed Syllabus

Course Code: 8223457	**Marks:** 100	**Credits:** 4	**Class Hour:** 56
Course Title: Developmental Psychology		**Course Type:** Allied	**Exam Hours:** 4

Course Description

Developmental Psychology is designed to provide students with knowledge about the developmental processes that occur from conception through adolescence. It provides a comprehensive overview of normative development and empirically derived milestones in physical, cognitive and socio-emotional developmental domains. This course also presents an overview of major developmental theories; research methods used in developmental psychology and the application of knowledge of child and adolescent development in the real world.

Course Learning Outcomes (CLOs)

After successful completion of the course, the students will be able to:

CLO 1: Explain the fundamental concepts, lifespan divisions, genetic mechanisms, and research methodology of developmental psychology to evaluate key determinants and patterns of human development.

CLO 2: Analyze major developmental theories (Freud, Erikson, Piaget) and evaluate the chronological processes, environmental factors, and complications involved in prenatal growth and birth.

CLO 3: Assess the physical, cognitive, linguistic, sensory, and psychosocial developmental processes from neonatal stage through childhood, incorporating theories of moral development and social play.

CLO 4: Examine the physical, cognitive, and psychosocial transitions of adolescence, including peer/family dynamics, identity choices, and high-risk behavioral issues such as delinquency, substance abuse, and suicide.

Course Contents

Week	Topics	Teaching-Learning Strategies	CLOs
1-2	**Introduction:** Definition of Developmental Psychology, Divisions of the life span, Patterns of Development, Goals of Developmental Psychology, Practical application of developmental psychology	Interactive lectures, multimedia presentations, class discussion, question–answer sessions	CLO1
3-4	**Developmental Determinants:** Biological determinants, Environmental determinants	Interactive lectures, class discussion, question–answer sessions.	CLO1
5-7	**Research Methods:** Self-Report: interviews and questionnaires, dairy study, the clinical method; Observation method, case studies, Twin studies; **Research Designs:** The correlational design, The cross-cultural design, The longitudinal design, The sequential design	Lectures, video demonstrations, case analysis, classroom discussion, question–answer sessions	CLO1
8-11	**Theories of Child Development:** Psychoanalytic theory of personality development, Erikson's theory of personality development, Piaget's theory of cognitive developmental stage.	Interactive lectures, PowerPoint presentations, video content, group presentations,	CLO2
12-14	**Prenatal Development:** How life begins, three stages of pre-natal development, Factors influencing prenatal development, Maternal factors, Environmental factors	Interactive lectures, group activities, case discussions, question–answer sessions	CLO2
15-16	**Birth:** Nature and type of birth, the birth processes, Birth complications	Interactive lectures, video analysis, case discussions.	CLO2
17-19	**Neonate:** Physical appearance and assessment, Physiological functioning, Behavioral capacities, Sensory capacities	Interactive lectures, group discussions, student Presentations, question-answer sessions	CLO3
20-24	**Infancy and Childhood** Physical Development: Body growth, Motor Development: The Sequence of motor development, Gross motor development, Fine motor development; Handedness, Play, Types of play, Importance of play, Components of Language: phonological, semantical, language develops, Speech disorder, Emotional Development, Social	Interactive lectures, group presentations, PowerPoint presentations, question–answer sessions	CLO3

	Development: Moral Development: Piaget's theory, Kohlberg's theory		
25-28	**Adolescence:** Physical Changes in Adolescence, Stage of Puberty, Growth spurt in height and weight, Changes in proportion and shape, hormonal controls, primary and secondary sex characteristics, psychological effects of physical changes, developmental tasks, Adolescent sexuality, Social Relationship, family-peer relationships, Vocational Choice: factors influencing vocation choice: personal and social factors, Problems in adolescence: juvenile delinquency, drug abuse, school dropout, suicide.	Lectures, problem-based learning, group discussions, PowerPoint presentations, student presentations, question–answer sessions	CLO4

Detailed Syllabus

Course Code: 8223458	**Marks: 50**	**Credits: 2**	**Class Hour: 42**
Course Title: Practical: Developmental Psychology			

Course Description

This laboratory course introduces students to the fundamental methods and techniques of experimental psychology through a series of practical experiments. It provides hands-on experience in designing, conducting, recording, analyzing, and interpreting psychological experiments related to perception, learning, memory, motivation, problem solving, sensory processes, and cognitive functioning. Students gain practical knowledge of psychological measurement, data collection, and scientific reporting while developing skills in observation, critical thinking, ethical research practices, and statistical interpretation. The course bridges theoretical concepts with practical application, enabling students to understand human behavior through empirical investigation and prepare for advanced study and research in psychology.

Course Learning Outcomes (CLOs)

After successful completion of the course, the students will be able:

CLO 1: Evaluate the impact of mental set and cognitive bias on individual problem-solving performance and decision-making strategies.

CLO 2: Analyze the interference effects (proactive and retroactive) of previously acquired information on the learning, retention, and recall of new paired associations.

CLO 3: Assess the role of overlearning and extended practice in facilitating long-term memory retention and recall efficiency.

CLO 4: Demonstrate how task completion status (Zeigarnik effect) influences memory recall and cognitive retention for interrupted versus completed tasks.

CLO 5: Investigate visual perceptual distortions and context-dependent illusions using experimental paradigms such as the Müller-Lyer illusion.

Detailed Syllabus

Course Code:	8222959	**Marks: 100**	**Credits: 4**	**Class Hours: 56**
Course Title: Biochemistry and Metabolism				

Course Description

This course introduces the biochemical basis of human nutrition and metabolism, emphasizing the structure, functions, digestion, absorption, transport, and metabolism of carbohydrates, proteins, lipids, vitamins, minerals, and water. It examines energy metabolism, metabolic integration, enzyme action, acid–base balance, and biochemical regulation of nutrients. The course also relates nutritional biochemistry to health, disease, dietary requirements, and common metabolic disorders, providing a foundation for clinical nutrition and dietetics.

Course Objectives

Upon completion of this course, students will be able to develop an understanding of the biochemical principles underlying human nutrition and metabolism; explain the digestion, absorption, transport, utilization, storage, and metabolism of major nutrients and micronutrients; understand energy production and metabolic regulation; and relate biochemical processes to nutritional status, health, disease, dietary management, and common metabolic abnormalities.

Course Learning Outcomes (CLOs)

CLO	**Course Learning Outcome**	**Bloom's Level**
CLO1	Explain the basic biochemical concepts, biomolecules, enzymes, metabolic pathways, and biochemical regulation relevant to human nutrition.	Understand
CLO2	Describe the digestion, absorption, transport, storage, and utilization of carbohydrates, proteins, and lipids.	Understand
CLO3	Explain the biochemical functions, metabolism, and nutritional significance of vitamins, minerals, electrolytes, and water.	Understand
CLO4	Analyze energy metabolism, ATP production, basal metabolism, substrate	Analyze

	utilization, and metabolic adaptation under different physiological conditions.	
CLO5	Explain and relate integrated metabolic pathways to nutritional status, growth, physical activity, fasting, pregnancy, and disease conditions.	
CLO6	Apply nutritional biochemistry principles to understand selected metabolic abnormalities and their implications for nutrition and dietary management.	Apply

Course Content

Week	Contents	Teaching–Learning Strategies	Assessment Methods	CLOs
1-3	**Fundamentals of Biochemistry:** Introduction to biochemistry and metabolism; Biochemical organization of the human body; Atoms, molecules, chemical bonds, acids, bases, pH, and buffers; Water and its biochemical importance; Major biomolecules: carbohydrates, proteins, lipids, and nucleic acids Cellular organization and biochemical compartments; Introduction to metabolic pathways Anabolism and catabolism; Homeostasis and metabolic regulation	Lecture, interactive discussion, concept explanation, molecular representation	Written examination, class test, short questions	CLO1
4-6	**Enzymes and Biochemical Regulation:** Structure and functions of enzymes; Enzyme–substrate interaction; Factors affecting enzyme activity; Cofactors, coenzymes, and prosthetic groups; Enzyme inhibition and activation; Allosteric and hormonal regulation; Enzymes of nutritional and clinical importance;	Lecture, discussion, diagrams, conceptual problem-solving	Written examination, class test, short questions	CLO1, CLO6

	Relationship between enzymes and metabolic disorders.			
7-10	**Carbohydrate Biochemistry and Metabolism:** Classification and structure of carbohydrates; Dietary carbohydrates and their nutritional significance; Digestion and absorption of carbohydrates; Blood glucose regulation; Glycolysis; Pyruvate metabolism; Citric acid/Krebs cycle; Gluconeogenesis; Glycogenesis and glycogenolysis; Pentose phosphate pathway; Regulation of carbohydrate metabolism Insulin, glucagon, and glucose homeostasis; Biochemical basis of diabetes mellitus	Lecture, numerical problem-solving, board work, discussion	Numerical problems, written examination, class test	CLO2, CLO6
11-14	**Protein and Amino Acid Metabolism:** Structure and classification of amino acids; Protein structure and biological functions; Dietary protein quality; Digestion and absorption of proteins; Amino acid pool and protein turnover; Transamination and deamination; Urea cycle and nitrogen balance; Essential and non-essential amino acids; Glucogenic and ketogenic amino acids; Protein metabolism during growth, fasting, and illness; Biochemical aspects of protein-energy malnutrition	Lecture, numerical exercises, graphical explanation, problem-solving	Numerical problems, written examination, class test	CLO2, CLO6
15-18	**Lipid Biochemistry and Metabolism:** Classification and structure of lipids; Fatty acids and essential fatty acids; Triglycerides, phospholipids, and sterols; Digestion and absorption of dietary lipids; Lipoproteins and lipid transport; β-oxidation of fatty acids; Fatty acid synthesis; Ketone body formation and utilization; Cholesterol metabolism; Eicosanoids and their nutritional significance; Regulation of lipid metabolism.	Lecture, cell-diagram demonstration, problem-solving, discussion	Written examination, numerical problems, class test	CLO2, CLO6
19-20	**Nucleic Acids and their roles:** Catalyst, homogeneous catalysis, enzyme catalysis, auto catalysis.	Lecture, discussion, conceptual explanation	Written examination, short questions,	CLO2
21-24	**Energy Metabolism and Integrated Metabolism:** Concept of energy in human nutrition; ATP and high-energy compounds; Biological oxidation and electron transport chain; Oxidative phosphorylation; Energy yield	Lecture, diagrams, model/visual demonstration,	Written examination, short questions, problem-	CLO3, CLO6

	from carbohydrates, proteins, and fats; Basal metabolic rate and energy expenditure; Metabolic integration among major nutrients	discussion	solving	
25-28	**Vitamins and Mineral Biochemistry:** Vitamins: Fat-soluble vitamins: A, D, E, and K; Water-soluble vitamins: B-complex and vitamin C Biochemical functions and coenzyme roles; Absorption, metabolism, storage, and excretion; Deficiency and toxicity; Nutritional and biochemical assessment. **Minerals:** Calcium, phosphorus, magnesium, sodium, potassium, and chloride; Iron, zinc, copper, iodine, selenium, and other trace elements; Mineral absorption and bioavailability; Electrolyt**e** and fluid balance; Mineral interactions; Biochemical basis of selected mineral deficiencies.	Lecture, structural representation, nomenclature exercises, discussion	Written examination, nomenclature exercises, class test	CLO3, CLO6

Detailed Syllabus

Course Code: 8222960	**Marks:** 50	**Credits:** 2	**Class Hours:** 42
Course Title: Practical: Biochemistry and Metabolism			

Course Description

This practical course provides hands-on experience in selected biochemical techniques relevant to nutrition and metabolism. Students perform basic qualitative and quantitative tests for carbohydrates, proteins, lipids, vitamins, and selected biochemical parameters, while learning principles of sample handling, laboratory safety, measurement, calculation, and interpretation. Practical activities also introduce basic assessment of glucose, lipid profiles, enzyme activity, and nutritional biomarkers, linking laboratory findings with nutritional and metabolic conditions.

Course Objectives

Upon successful completion of this course, students will be able to develop students' practical skills in basic nutritional biochemistry laboratory procedures; enable them to identify and estimate selected nutrients and biochemical constituents; develop competence in sample collection, handling, measurement, calculation, and laboratory safety; and strengthen their ability to interpret basic biochemical findings in relation to nutritional status, metabolism, and common health conditions. By the end of this course, students will be able to:

Course Learning Outcomes (CLOs)

CLO	**Course Learning Outcome**	**Bloom's Level**
CLO 1	Demonstrate appropriate laboratory safety, personal protection, sample handling, and basic biochemical laboratory procedures.	Understand
CLO 2	Perform qualitative tests for selected carbohydrates, proteins, lipids, and other nutritional compounds.	Analyze
CLO 3	Conduct basic quantitative biochemical estimations using appropriate laboratory methods and instruments.	Evaluate
CLO 4	Calculate and interpret selected biochemical parameters relevant to nutritional assessment.	Evaluate
CLO 5	Identify potential relationships between biochemical findings and nutritional or metabolic abnormalities.	Analysis
CLO 6	Prepare and present accurate laboratory records, calculations, results, observations, and practical reports.	Evaluate

Course Title: Social Work Practice			

Course Description

This course provides an introductory and comprehensive understanding of Social Work as a knowledge-based, value-oriented and practice-focused discipline. It introduces students to the fundamental concepts, principles, values, ethics, historical development and contemporary fields of Social Work practice in Bangladesh and global context. The course highlights Social Work as an emerging profession in Bangladesh and examines its applications in hospitals, government social welfare programs, NGOs, community settings, probation and correctional services. It also explores major social problems and social services, basic Social Work methods and skills, social research, climate justice, sustainable development, and the implications of the Fourth and Fifth Industrial Revolutions and Artificial Intelligence for Social Work. Through field-based learning, students will develop basic communication, analytical, problem-solving, digital, AI-assisted and employability skills relevant to contemporary society and public and private service sectors.

Course Rationale and Objectives

- **Introduce students to** the fundamental concepts, principles, values, ethics, scope and contemporary relevance of Social Work;
- **Provide students with** a brief understanding of the historical emergence and development of Social Work in Bangladesh and the global context, and its evolution as an emerging profession;
- **Familiarize students with** major fields of Social Work practice in Bangladesh, including hospitals, government social welfare services, NGOs, community settings, probation and correctional services;
- **Develop students' ability to understand and respond to** contemporary social problems through basic Social Work methods, communication, helping, advocacy, networking, problem-solving, climate justice and sustainable development perspectives;
- **Develop awareness of** the implications of the Fourth and Fifth Industrial Revolutions, Artificial Intelligence and digital transformation for Social Work practice, professional development and employment;
- **Develop students' basic research, field-based and employability skills** through evidence-based learning, responsible use of AI tools, field observation, teamwork, communication, analytical reasoning and reflective practice.

Course Learning Outcomes (CLOs)

CLO Code	**Bloom's Revised Taxonomy Stage**	**Course Learning Outcomes (CLOs)**
CLO1	Remember and Understand	Explain the fundamental concepts, principles, values, ethics, scope, and historical foundations of Social Work, Social Welfare, and related social development practices.
CLO2	Understand	Describe and analyze the emergence, development, and contemporary

CLO Code	Bloom's Revised Taxonomy Stage	Course Learning Outcomes (CLOs)
	and Analyze	practice of Social Work in Bangladesh and the global context.
CLO3	Analyze	Analyze major social problems, social services, Social Work interventions, basic methods, research approaches, and emerging social risks from individual, community, and societal perspectives.
CLO4	Apply and Evaluate	Apply basic Social Work knowledge, communication, helping, advocacy, networking, and problem-solving skills to contemporary social issues and field-based situations.
CLO5	Evaluate and Create	Evaluate and develop personal digital, AI-assisted, analytical, communication, teamwork, adaptability, and employability skills to respond effectively to the challenges of the Fourth and Fifth Industrial Revolutions.
CLO6	Evaluate and Create	Develop evidence-informed and socially responsible responses to social problems, climate vulnerability, social inequality, and sustainable development challenges through Social Work perspectives.

Guideline of Field Work

Course Code: 8222160	**Marks:** 50	**Credits:** 2	**Practice Hours:** 112
Course Title: Field Work			

Course Description

Field work consists of supervised practice in problem solving and socio-economic development activities in recognized government or non-government agencies operating in respective areas. Through field practicum students are expected to learn to apply social work knowledge and develop insight in professional context and acquire necessary skills. The Department of Social Work of the concerned college will arrange placement of students in different agencies at random basis. The students will be required to do field practicum for a period of 112 working hours under the direct supervision of an agency executive along with a counterpart teacher of the department.

Course Objectives

The objectives of the course are to:

- Provide students with knowledge of social work practices;
- Encourage them to practice social work methods in the field in the agencies of government organizations and non-governmental organizations;
- Help them apply social work theories to various settings and user groups;
- Encourage students to practice social work principles and values while working with people and groups;
- Help them develop case studies for problem detection and intervention;
- Help them create fieldwork reports and share knowledge and experiences.

Course Content

Fieldwork is an essential part of the social work education and is compulsory for all students. All students are placed in the social services and development agencies for the fieldwork for 112 hours. No field placement will be provided if a student fails to complete all theoretical courses in the syllabus. In the fieldwork, students will be required to apply theoretical knowledge gained in the classroom during their study. Each student will be trained by a teacher in the Department and supervised by the Chief Executive or by a senior official in the agency as external supervisor. At the end of the internship, students must submit a detailed report.

Course Learning Outcomes (CLOs)

After the successful completion of the course, students will be able to:

CLO1: Learn how to apply social work practices in the field;
CLO2: Apply social work practices while working with individuals, groups and communities;

CLO3: Intervene with social work theoretical knowledge at various levels of practice;
CLO4: Apply social work principles and values, skills & knowledge to a specific social environment during practical work;
CLO5: Gain an in-depth understanding of different aspects of people's lives as individuals, groups & communities;
CLO6: Prepare and submit fieldwork reports and share experiences etc.;

Teaching System
Under the guidance of a faculty member, students will carry out individual or group field practicums. Also, other teaching strategies include orientation class, class lectures, handouts, power point presentations, seminar presentation, symposium, discussion, reading assignments, content analysis, paraphrasing, citation, referencing, exhibition of audio-visual recordings, visit and demonstration etc. according to pedagogy.

Assessment Procedure
The evaluation will be based on the report, the presentation and/or the viva of fieldwork report. Also, students will be evaluated based on their performance in the agency's fieldwork. Candidates will be judged based on their honesty, loyalty, integrity, and the fieldwork report they submit. However, continuous evaluation of the respective students by the teacher and the academician will be conducted though the academic year long. The students will be required to write a final report on his/her field practicum which will be examined by the supervisors responsible for field instructions. Thirty-five (35) marks are allotted for the field practicum performance and report writing which will be awarded jointly by the supervisors concerned. There will be a viva-voce examination which will carry fifteen (15) marks.

Detailed Syllabus

Course Code: 8222059	**Marks: 100**	**Credits: 4**	**Class Hours:56**
Course Title: Sociology of Bangladesh		**Course Type: Allied**	**Exam Hours: 4**

Course Description

Sociology of Bangladesh offers a comprehensive exploration of the structural foundations, cultural diversity, and dynamic transformations of Bangladeshi society. Designed to bridge academic theory with everyday reality, the course examines how ecological factors, colonial legacies, and the 1971 Liberation War have shaped the nation's social institutions. Students will critically analyze rural and urban class structures, changing family dynamics, economic shifts driven by the RMG sector and remittances, and the rich tapestry of ethnic coexistence. Through the lens of foundational sociological theories, the curriculum addresses contemporary challenges—including gender inequality, poverty, and climate change vulnerability—empowering students to collaborate effectively and relate sociological insights to national development and real-world issues.

Course Objectives

After successful completion of this course, students will be able to:

- Develop an understanding of the major features, concepts, and characteristics of Bangladeshi society, including its social, cultural, economic, and political conditions.
- Explain the historical development of Bangladesh society, including the impacts of ecological factors, colonial experiences, the Language Movement, and the Liberation War.
- Understand the structure and functions of major social institutions, including family, culture, education, economy, politics, and governance systems in Bangladesh.
- Analyze contemporary social issues of Bangladesh, including inequality, poverty, gender issues, migration, urbanization, and climate change vulnerability from a sociological perspective.
- Apply basic sociological concepts and theories to understand social problems and social transformation processes in Bangladeshi society.
- Develop awareness of cultural diversity, ethnic coexistence, and changing patterns of identity within Bangladesh.
- Relate sociological knowledge to everyday life, national development, and real-world social challenges.

- Develop collaborative learning skills through discussion, case studies, presentations, and analysis of social issues in Bangladesh.

Course Learning Outcome (CLO)

CLO	Course Learning Outcome Statement	Bloom's Level
CLO 1	Appreciate the importance of cultural diversity and ethnic coexistence in Bangladesh.	**Affective:** Valuing (A3) / **Cognitive:** Understanding (C2)
CLO 2	Analyze several changing social issues of Bangladesh from a sociological perspective.	**Cognitive:** Analyzing (C4)
CLO 3	Explain the basic concepts, institutions, and characteristics of the society of Bangladesh.	**Cognitive:** Understanding (C2)
CLO 4	Apply fundamental sociological theories to be informed about social problems in Bangladesh.	**Cognitive:** Applying (C3)
CLO 5	Illustrate the historical evolution, social background, family system, economy, and political system of Bangladesh.	**Cognitive:** Understanding (C2) / Applying (C3)
CLO 6	Collaborate with peers on sociological ideas effectively for Bangladeshi society.	**Affective:** Organizing / Responding (A2/A4) / **Psychomotor:** Articulation

Detailed Syllabus

Course Code: 8222165	**Marks:** 100	**Credits:** 4	**Class Hours:** 56
Course Title: Bangladesh Society and Culture		**Course Type:** Allied	**Exam Hours:** 4

Course Descriptions

This course provides a comprehensive sociological and anthropological analysis of Bangladesh society and culture. Students will explore the historical evolution, social structures, cultural patterns, and contemporary transformations of the country.

Course Objectives

- To provide students with a comprehensive understanding of the historical, social, and cultural evolution of Bangladesh from ancient Bengal to the post-independence era.
- To analyze the core social structures, institutions, and forms of stratification, including class, gender, caste, and power relations in rural and urban settings.
- To explore the pluralistic nature of Bangladeshi culture, covering religious traditions, secular celebrations, folk philosophies, and diverse artistic expressions.
- To examine the socio-economic challenges and cultural dynamics of ethnic minorities and marginalized communities within Bangladesh.
- To critical evaluate the impacts of globalization, urbanization, climate change, and economic transformations on contemporary Bangladeshi society.

Course Learning Outcomes (CLOs)

CLO	Course Learning Outcomes	Bloom's Level
CLO1	Trace and explain the historical trajectories, turning points, and cultural shifts that shaped the national identity of Bangladesh.	Understand / Analyze (C2/C4)
CLO2	Critically analyze structural inequalities, power dynamics, and institutional transitions within rural and urban families and communities.	Analyze (C4)
CLO3	Demonstrate a nuanced understanding of cultural syncretism, literary heritages, and folk traditions unique to the Bengal delta.	Understand / Analyze (C2/C4)
CLO4	Assess the distinct socio-legal and economic vulnerabilities faced by indigenous peoples and marginalized groups in the country.	Evaluate (C5)
CLO5	Evaluate how global vectors like the Readymade Garment (RMG) industry, international migration, and climate vulnerability drive social change in Bangladesh.	Evaluate (C5)

Detailed Syllabus

Course Code: 8223261	**Marks:** 100	**Credits:**4	**Class Hours:** 56
Course Title: Tourism Geography and Bangladesh Tourism Resources		**Course Type:** Allied	**Exam Hours:** 4

Course Description

This course introduces the geographical principles of tourism and examines the relationship between geography, travel patterns, destinations, resources, and tourism development. It focuses on the physical, cultural, historical, and socioeconomic tourism resources of Bangladesh, including beaches, forests, rivers, hills, archaeological sites, heritage, religious attractions, and cultural landscapes. Students develop an understanding of destination distribution, accessibility, regional tourism potential, and sustainable utilization of Bangladesh's tourism resources

Course Objectives

- To develop students' understanding of tourism geography and the spatial distribution of tourism resources;
- Students can explain the influence of physical, cultural, economic, and environmental factors on tourism development; identify and assess major tourism resources of Bangladesh;
- To develop awareness of destination planning, accessibility, resource conservation, and sustainable tourism development.

Course Learning Outcomes (CLOs)

CLO No.	**Course Learning Outcome**
CLO 1	Explain the fundamental concepts of tourism geography and the geographical factors influencing tourism demand, movement, and destination development.
CLO 2	Identify and classify major natural, cultural, historical, archaeological, religious, and recreational tourism resources of Bangladesh.
CLO 3	Analyze the geographical distribution, accessibility, tourism potential, and development challenges of selected destinations in Bangladesh.
CLO 4	Apply basic principles of sustainable destination planning and resource management to promote responsible tourism development in Bangladesh.

Detailed Syllabus

Course Code: 8222259	**Marks:** 100	**Credits:** 4	**Class Hours**: 56
Course Title: Economy of Bangladesh		**Course Type:** Allied	**Exam Hours:** 4

Course Descriptions

This course introduces Home Economics Honours students to the structure, performance, and policy management of the Bangladesh economy. It begins with an overview of macroeconomic trends in growth, savings, and investment before moving into the fiscal, monetary, and external sectors that underpin national economic management. Particular attention is given to the agriculture and industrial sectors, the role of state-owned enterprises, and the ongoing shift toward private sector-led development. The course also examines employment, wages, and poverty trends alongside government efforts in human development and social protection, and closes with a look at infrastructure, environmental challenges, and Bangladesh's climate vulnerability. Rather than treating economics as a technical subject in isolation, the course consistently draws out its political dimensions: budget-making as a political act, regulatory reform as a contest of interests, and development planning as a reflection of governance priorities. By the end, students should be able to follow Bangladesh's economic policy debates with confidence and understand economic performance as part of the larger picture of governance.

Course Objective

Upon successful completion of this course, students will be able to:

- Build a working understanding of Bangladesh's macroeconomic structure, growth performance, and the institutional framework within which economic policy is formulated and implemented.
- Examine the role and performance of the agriculture, industrial, and external sectors in Bangladesh's development, along with the government policies that shape them.
- Assess the fiscal and monetary management practices of Bangladesh, including public revenue and expenditure, taxation, budgetary management, banking, and financial sector reforms.
- Analyze trends in employment, wages, prices, and poverty in Bangladesh, and evaluate the effectiveness of government programs addressing these areas.
- Develop the ability to critically connect Bangladesh's economic performance with questions of governance, public policy, and political decision-making, so that economic issues can be read through a political science lens.

Course Learning Outcomes (CLOs)

Upon successful completion of the course, students will be able to:

CLO	Course Learning Outcomes	Bloom's Level	PLO
CLO1	Demonstrate a clear and working understanding of Bangladesh's macroeconomic performance, national income, savings, and investment trends, and the institutional structure guiding economic policy.	Understand / Apply (C2/C3)	PLO1, PLO2, PLO3
CLO2	Analyze the contribution, performance, and challenges	Analyze (C4)	PLO1,

Interactive lectures, group discussion, guided reading assignments	Written assignment on banking and financial sector reforms	CLO3
15–19	**The External Sector:** world trade scenario, export and import policy, tariff structure, Bangladesh's position in the WTO and regional trade arrangements, balance of payments, exchange rate policy, and foreign exchange reserves.	Interactive lectures, group discussion, thematic assignments	Thematic assignment on trade policy and balance of payments	CLO2, CLO5
20–21	**Agriculture, Industry and State-Owned Enterprises:** management of food grain production and agricultural credit; growth and performance of the manufacturing sector and SMEs; the production, financial performance, and reform of state-owned enterprises.	Interactive lectures, sector case studies, group presentations	Group presentation based on a sector case study	CLO2
22–23	**Power, Energy, Transport, Communication and Human Development:** power generation and transmission, transport and communication infrastructure, and human development outlays covering education, health, women and children's affairs, and social welfare.	Interactive lectures, documentary screening, group discussion	Reflective assignment following documentary screening	CLO2, CLO4
24–26	**Poverty Alleviation, Private Sector Development and Environment:** poverty trends and reduction strategies, employment generation programs, a	Interactive lectures, thematic assignments,	Policy debate evaluation on poverty alleviation and	CLO4, CLO5

Week	Topics	Teaching-Learning Strategy	Assessment Strategy	CLOs
	private-investment-friendly environment, privatization and public-private partnership, and environmental and climate change challenges facing Bangladesh.	policy debate	environment	
27–28	Revision, Doubt-clearing Session, and Preparation for the Final Examination	Comprehensive review lecture and open discussion	Comprehensive review covering all chapters	All CLOs

Course Assessment Framework

Total Course Marks: 100 Examination Duration: 4 Hours

Assessment Category	Assessment Component	Weightage
Formative Assessment (20%)	Attendance & Class Participation	5%
	In-course Examination	10%
	Quiz / Assignment Presentation	5%
Summative Assessment (80%)	Final Examination • Students will have to answer 8 questions out of 12 • 10 marks per question ($8 \times 10 = 80$ marks) • Each question may contain maximum 3 sub-sections (e.g., a, b, c)	80%
