NATIONAL UNIVERSITY BANGLADESH

PROVISIONAL

Syllabus

Bachelor of Social Science (Honors) Second Year

Department of Anthropology

Effective from the Session: 2024–2025 and onwards

Vision of the University
We expect that the hundredth anniversary of the National University, our commitment to "Progress for Everyone" will be evident in all areas of our operations and stakeholder engagements.

We leverage our core strength in education, research, and community engagement to address pressing global issues and foster sustainable development.

By 2042, National University aims to strengthen its positions as Bangladesh's top academic institution and rank among the world's leading universities. Our focus will be on expanding expertise building strategic partnerships, and increasing our global influence. Our services will be measured by the achievements of the individuals and communities we serve.

Mission of the University
To promote "Progress for Everyone" by fostering transformative education, conducting pioneering research, and encouraging meaningful collaboration with individuals, communities, and partners both in Bangladesh and around the world.

Vision of the Department
To nurture ethically grounded, research-driven anthropologists who engage critically with culture, society, and development, and contribute meaningfully to inclusive knowledge, policy, and public life in Bangladesh and beyond.

Mission of the Department

M1	**To provide a broad-based, field-oriented, and theoretically rigorous education** that enables students to understand human diversity, social transformation, and cultural meaning across time and space.
M2	**To cultivate critical inquiry and applied research skills** that empower students to engage with contemporary challenges—such as inequality, environment, health, migration, and identity—through anthropological methods and perspectives.
M3	**To embed national heritage, ethics, and social engagement** into the curriculum by connecting anthropological training with local communities, cultural traditions, public institutions, and development sectors.

Program Education Objectives (PEO)

PEO1	**Disciplinary Knowledge and Professional Competence**: Graduates will apply and critically evaluate established and contemporary anthropological theories, concepts, perspectives, and ethnographic methods to interpret complex sociocultural phenomena and address professional, research, and development-related problems with appropriate use of digital and analytical tools. **Primary BNQF domain:** Fundamental **Supporting domain:** Thinking **Bloom's level:** Apply, Analyze, Evaluate
PEO2	**Ethical, Inclusive, and Culturally Responsive Practice:** Graduates will make ethically informed and culturally responsive decisions in academic, professional, and community settings, demonstrating respect for cultural diversity, human dignity, social justice, environmental responsibility, and the rights and perspectives of diverse and marginalized populations. **Primary BNQF domain:** Personal **Supporting domain:** Social, Thinking **Bloom's level:** Apply, Evaluate

PROVISIONAL

PEO3	**Communication, Collaboration, and Leadership:** Graduates will communicate anthropological knowledge, evidence, problems, and solutions clearly and effectively in Bangla and English to academic, professional, community, and public audiences, and will collaborate across disciplines while assuming appropriate leadership and responsibility in team-based activities and projects. **Primary BNQF domain:** Social **Supporting domain:** Thinking **Bloom's level:** Apply, Create
PEO4	**Autonomous Learning, Innovation, and Professional Development:** Graduates will engage in self-directed learning, reflective practice, and continuing academic or professional development, using critical and creative thinking to generate, adapt, and communicate new ideas and innovative approaches to anthropological scholarship and practice. **Primary BNQF domain:** Personal **Supporting domain:** Thinking **Bloom's level:** Analyze, Evaluate, Create
PEO5	**Community Engagement and Sustainable Social Impact:** Graduates will apply anthropological knowledge and evidence to design, implement, and critically assess culturally grounded and context-sensitive initiatives addressing contemporary social, economic, health, educational, environmental, and heritage-related challenges at local, national, and global levels. **Primary BNQF domains:** Thinking, Social **Supporting domains:** Fundamental, Personal **Bloom's level:** Apply, Analyze, Evaluate, Create

Program Learning Outcomes (PLOs)

Based on BNQF Level 7 descriptors and aligned with the four learning domains (Fundamental, Social, Thinking, Personal) the Program Learning Outcomes (PLOs) for the 4 core 2nd-year papers of the National University's BSS Honours course in anthropology are -

PLO Code	PLO Statement	BNQF Domain	Bloom's Level (Target)
PLO 1	**Explain and critically interpret** established and contemporary anthropological theories, concepts, perspectives, and intellectual traditions and their development within the discipline.	Fundamental	Understand, Analyze
PLO 2	**Apply** appropriate qualitative, ethnographic, and related social research methods, including ethical procedures, sampling, data collection, documentation, and digital research tools, to investigate sociocultural questions.	Fundamental	Apply
PLO 3	**Analyze and interpret** complex social, cultural, economic, political, and environmental phenomena using anthropological, comparative, contextual, and interdisciplinary perspectives.	Thinking	Analyze
PLO 4	**Critically evaluate** anthropological theories, arguments, evidence, methodological approaches, and cultural practices by considering cultural relativism,	Thinking	Evaluate

PROVISIONAL

PLO Code	PLO Statement	BNQF Domain	Bloom's Level (Target)
	positionality, ethics, power, and competing perspectives.		
PLO 5	**Design, conduct, document, and reflect upon** an ethically sound ethnographic or anthropological inquiry using appropriate research design, fieldwork, data-management, analytical, and digital techniques with increasing autonomy.	Fundamental/ Thinking/Personal	Create, Apply, Evaluate
PLO 6	**Communicate and disseminate** anthropological knowledge, evidence, arguments, problems, and solutions clearly and effectively in Bangla and English through appropriate oral, written, visual, and digital formats for academic, professional, and non-specialist audiences.	Social	Apply, Create
PLO 7	**Collaborate effectively and demonstrate ethical accountability, cultural sensitivity, respect for diversity, and responsible citizenship** in academic, professional, and community-based context.	Social/Personal	Apply, Evaluate
PLO 8	**Demonstrate autonomous and reflective learning** by identifying learning needs, evaluating personal and professional performance, using feedback, and developing plans for continuing academic, professional, and lifelong learning.	Personal	Evaluate, Create
PLO 9	**Apply, integrate, and critically evaluate anthropological insights and evidence** to understand contemporary transformations and develop context-sensitive responses to sociocultural, economic, political, environmental, health, educational, and heritage-related issues at local, national, and global levels.	Fundamental / Thinking / Social	Apply, Analyze, Evaluate, Create

PROVISIONAL

PEO–PLO Contribution/Alignment Matrix

The PEO-PLO mapping matrix below illustrates how the Program Educational Objectives contribute to the attainment of the Program Learning Outcomes.

PEO / PLO	PLO 1	PLO2	PLO 3	PLO 4	PLO 5	PLO 6	PLO 7	PLO 8	PLO 9
PEO1. Disciplinary Knowledge & Professional Competence	**3**	**3**	**3**	**3**	**3**	**2**	**1**	**2**	**3**
PEO2. Ethical, Inclusive & Culturally Responsive Practice	**2**	**3**	**2**	**3**	**3**	**2**	**3**	**2**	**3**
PEO3. Communication, Collaboration & Leadership	**1**	**2**	**2**	**2**	**2**	**3**	**3**	**2**	**2**
PEO4. Autonomous Learning, Innovation & Professional Development	**2**	**2**	**3**	**3**	**3**	**2**	**2**	**3**	**3**
PEO5. Community Engagement & Sustainable Social Impact	**2**	**3**	**3**	**3**	**3**	**3**	**3**	**2**	**3**

PROVISIONAL

3-point contribution scale:

3 = Strong contribution: the PEO directly and substantially supports attainment of the PLO.

2 = Moderate contribution: the PEO supports the PLO meaningfully but indirectly or as a secondary outcome.

1 = Introductory contribution: the PEO provides a foundation for the PLO at this stage.

Note: The PEO–PLO mapping shows how the Program Educational Objectives build, step by step, toward the Program Learning Outcomes at the second-year level of the BSS Honours Program in Anthropology. PEO1 lays the main disciplinary groundwork, helping students gain and apply anthropological knowledge, research methods, analytical reasoning, critical evaluation, and ethnographic inquiry. PEO2 deepens the ethical, inclusive, culturally sensitive,

and socially responsible side of learning, especially in research and community work. PEO3 focuses on communication, collaboration, teamwork, and the growth of leadership and interpersonal skills. PEO4 encourages independent learning, critical reflection, innovation, and ongoing professional development, which together strengthen students' analytical and self-directed learning abilities. PEO5 ties anthropological knowledge to community engagement and lasting social impact, helping students apply their research, analytical, communication, and teamwork skills to real-world sociocultural issues.

At the second-year stage, the PEOs are still shaping PLO attainment rather than fully achieving every graduate-level attribute. The mapping therefore captures how each PEO contributes to building the knowledge, skills, ethical values, social competencies, critical thinking, and personal qualities students will need to reach the full Program Learning Outcomes by graduation. Together, the five PEOs ensure well-rounded development across the BNQF learning domains—Fundamental, Social, Thinking, and Personal—while moving students from understanding and application toward analysis, evaluation, and creation, in line with the revised Bloom's taxonomy.

Detailed Syllabus

Course Code: 8224051	**Marks:** 100	**Credits:** 4	**Class Hours:** 56
Course Title: Early Anthropological Theory (EAT)		**Course Type:** Core	**Exam Hours:** 4

Course Description

This course presents a brief introduction on the early formative years of anthropology as an academic discipline. It has focused on the history of anthropological thoughts and theories developing between late 19th and early 20th centuries. The content consists of a critical assessment of the prominent theoretical traditions, their shortcomings and contributions to the discipline.

Course Objectives

To familiarize students with a discipline that was primarily highly Western and colonial in nature at its inception. However, through a close chronological reading of the discipline, this course will give the students a valid scientific lens to work with on human nature, society and culture.

Course Learning Outcomes (CLOs)

CLO Code	CLO Statement	Course Content Covered	BNQF Domain	Bloom's Level	Mapped PLO(s)
EAT-CLO 1	Recall and describe the precursors of anthropological thought from ancient Greece and Rome through the Enlightenment and Renaissance, identifying key thinkers and their contributions.	Content 1	Fundamental	Remember	PLO1
EAT-CLO 2	Explain the core tenets of the 19th-century Evolutionary School, including Darwin's influence and the contributions of Engels, McLennan, Spencer, Morgan, and Tylor, and the reasons for its rejection.	Content 2	Fundamental	Understand	PLO1
EAT-CLO 3	Explain the Diffusion School of Thought, distinguishing between German, British, and American variants and their key propositions on migration and borrowing.	Content 3	Fundamental	Understand	PLO1

PROVISIONAL

CLO Code	CLO Statement	Course Content Covered	BNQF Domain	Bloom's Level	Mapped PLO(s)
EAT-CLO 4	Explain the key principles of Historical Particularism as developed by Franz Boas, Alfred Kroeber, and Robert Lowie.	Content 4	Fundamental	Understand	PLO1
EAT-CLO 5	Explain Functionalism (Durkheim, Malinowski) and Structural Functionalism (Radcliffe-Brown), identifying their central arguments and methodological approaches.	Content 5	Fundamental	Understand	PLO1
EAT-CLO 6	Explain the Culture and Personality School, including the contributions of Benedict and Mead, and their core assumptions.	Content 6	Fundamental	Understand	PLO1
EAT-CLO 7	Compare and contrast different early theoretical schools on fundamental anthropological questions (e.g., culture, society, evolution, diffusion).	Contents 2-6	Thinking	Analyze	PLO3
EAT-CLO 8	Critically evaluate the strengths, weaknesses, and limitations of each early theoretical school, including the reasons for their rejection or modification.	Contents 2-7	Thinking	Evaluate	PLO4
EAT-CLO 9	Critically evaluate the critiques leveled against Functionalism, Structural Functionalism, and the Culture and Personality School.	Contents 5-7	Thinking	Evaluate	PLO4
EAT-CLO 10	Analyze the historical and intellectual contexts that shaped the emergence and development of early anthropological theories	Contents 1-2, 8	Thinking	Analyze	PLO3, PLO4
EAT-CLO 11	Assess the overall contributions of early anthropological theories to the development of the discipline and their legacy for contemporary anthropology.	Content 8	Thinking	Evaluate	PLO4, PLO8

PROVISIONAL

CLO Code	CLO Statement	Course Content Covered	BNQF Domain	Bloom's Level	Mapped PLO(s)
EAT-CLO 12	Construct a critical synthesis and argument assessing the relevance of early anthropological theories to understanding contemporary social and cultural issues.	Contents 7-8	Thinking /Personal	Create	PLO6, PLO9

Course Plan

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
1. Week 1,2	**Unit 1: Precursors of anthropological traditions:** from ancient Greece and Rome to Enlightenment and Renaissance.	Students create a chronological timeline placing key precursor thinkers (Herodotus, Ibn Khaldun, Montesquieu, etc.) alongside major world events. They identify which "proto-anthropological" questions each raised (e.g., human diversity, social organization, cultural difference).	**1. Diagnostic quiz and timeline activity:** Students identify major precursor thinkers, explain their central ideas, and submit a timeline with brief annotations showing how each contributed. **2. Short source-analysis exercise**: Students compare two historical accounts and identify assumptions concerning culture, civilization, difference and human nature.	CLO 1 & 2: Identifies foundational ideas that later shaped anthropology. Analyzes how classical and Enlightenment thinkers framed questions about "the other" within their specific socio-political contexts (colonialism, exploration, scientific revolution).
2. Week 3,4,5,6	**Unit 2: 19th Century evolutionary school of thought:** Darwin's impact, social and cultural theories of evolution (Engels, McLennan, Spencer, Morgan and Taylor) and the rejection of the school.	Students are given ethnographic reports from colonized regions and asked to arrange societies on a unilineal ladder from "savagery" to "civilization" using Morgan/Taylor's criteria. They then debate the ethical and logical	**1. Concept quiz and analytical concept map:** distinguishing Darwinian evolution from anthropological/ social evolutionary theories. **2. Comparative theorist brief:** Students compare at least three evolutionary theorists	CLO 1, 2 & 3: Defines unilineal evolution and differentiates each theorist's contribution. Analyzes Darwin's impact and the colonial context. Critically

PROVISIONAL

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
		problems with this exercise.	in terms of concepts, evidence, assumptions and explanatory models. **3. Structured critique of simulation:** Students identify ethnocentrism, speculative reasoning and methodological limitations in their classification. **4. Debate performance and individual reflective note:** Assessment focuses on evidence use, argumentation, counterargument and critical reflection.	evaluates ethnocentrism, speculative methodology, and the school's eventual rejection.
3. Week 7,8,9	**Unit 3: Diffusion School of Thought:** Migration and borrowing, rise and fall of German, British and American Schools.	Students are given a map and a list of cultural traits (pyramids, pottery styles, myths). They must argue for either diffusion (migration/borrowing) or independent invention as the explanation, taking sides as German, British, or American diffusionists.	**1. Map-based analytical task:** Students propose and justify diffusion or independent invention as explanations for selected cultural similarities. **2. Comparative matrix and short presentation:** assessing differences in assumptions, methods and explanations among the three schools. **3. Individual analytical response:** Students evaluate both the contribution and limitations of diffusionism, particularly its treatment of	CLO 1 & 3: Differentiates the three national schools of diffusionism. Critically assesses the school's weakness (inability to explain why borrowing occurs) and its contribution to challenging evolutionism's rigid stages.

PROVISIONAL

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
			borrowing and cultural change.	
4. Week 10,11, 12,13	**Unit 4: Historical Particularism:** Franz Boas; Alfred Kroeber and Robert Lowie.	Students role-play a debate where Boas and his students (Kroeber, Lowie) critique the Evolutionists using arguments from historical particularism (empirical fieldwork, cultural relativism, anti-racism, and the "superorganic").	**1. Source-based critical response:** Students identify Boasian arguments against racial determinism and speculative reconstruction. **2. Role-play assessment and peer evaluation:** Students demonstrate accurate use of historical particularist concepts and evidence. **3. Comparative analytical essay:** Students evaluate Kroeber/Lowie's contributions and the strengths and limitations of historical particularism. **4. Seminar presentation and synthesis paragraph:** Students explain how historical particularism reoriented anthropology toward fieldwork and empirical evidence.	CLO 2, 3 & 4: Analyzes how Boas' reaction against racism and speculative history shaped his theoretical stance. Evaluates the strengths (fieldwork, relativism) and weaknesses (anti-generalization). Synthesizes how this school fundamentally reoriented the discipline toward empirical science.
5. Week 14,15, 16,17	**Unit 5: Functionalism** (Durkheim, Malinowski), Structural Functionalism (Radcliffe-Brown) **and their critiques.**	Students read a brief ethnographic case (e.g., a ritual, kinship system). They analyze it first using Malinowski's psychological functionalism (individual needs) and then using	**1. Short analytical exercise:** applying functional concepts to a selected social institution or ritual. **2. Case-study analysis:** Students apply Malinowskian functionalism to explain a selected	CLO 1, 3 & 5: Clearly differentiates Malinowski from Radcliffe-Brown. Critiques both for ahistoricism,

PROVISIONAL

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
		Radcliffe-Brown's structural functionalism (social cohesion). They write a comparative critique.	ethnographic institution or practice. **3. Comparative analytical assignment:** Students explain how the two approaches generate different interpretations of the same social phenomenon. **4. Critical response paper:** Students evaluate functionalism using evidence and identify its limitations in explaining conflict and historical transformation.	teleology, and inability to explain conflict/change. Applies functionalist logic to interpret real-world social institutions.
6. Week 18,19, 20,21	**Unit 6: Culture and Personality School** (Benedict, Mead) **and the critique.**	Students read short excerpts from Benedict (*Patterns of Culture*) and Mead (*Coming of Age in Samoa*). They identify how each links culture to personality. They then critique the school for overgeneralization, methodological issues, and the problematic "national character" studies it inspired.	**1. Reading response:** Students identify how Benedict and Mead conceptualize relationships between culture, personality and socialization. **2. Comparative worksheet and group presentation:** Students compare theoretical assumptions and evidentiary approaches. **3. Critical review:** Students evaluate methodological, ethical and theoretical problems in selected culture-and-personality studies. **4. Individual position paper:** Students formulate an	CLO 2, 3 & 5: Connects this school to the rise of Freudian psychology and interwar anxieties. Critiques its deterministic view of culture, weak methodology, and ethical issues. Applies the critique to contemporary debates on cultural determinism vs. universal human behavior.

PROVISIONAL

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
			evidence-based argument addressing the limits of cultural determinism.	
7. Week: 22-24	**Unit 7: Early Anthropological Theories:** A critical assessment	Students consolidate their previously filled comparative matrix (strengths/weaknesses of all schools). They engage in a structured seminar discussion addressing: "Which school had the most damaging flaw? Which made the most enduring contribution?"	**1. Comparative matrix submission:** Students assess each school according to assumptions, methodology, evidence, colonial bias, explanatory power and contribution. **2. Analytical seminar and peer assessment:** Students defend claims with appropriate theoretical and historical evidence. **3. Individual synthesis essay:** Students construct an argument explaining major continuities and breaks in early anthropological theory.	CLO 3 & 4: Evaluates all schools holistically against common criteria (methodology, colonial bias, explanatory power, lasting influence). Constructs a coherent synthesis of the discipline's theoretical journey and identifies persistent debates.
8. Week 25- 28	**Unit 8: Early Anthropological Theories:** Contribution to the development of the discipline.	Students write a concluding reflection tracing how each school contributed to later developments (e.g., Evolutionism → Neo-Evolutionism; Functionalism → Structuralism; Historical Particularism → Interpretive Anthropology). They identify which school's legacy is	**1. Theory genealogy exercise:** Students construct and explain links such as Evolutionism → Neo-Evolutionism and Functionalism → Structuralism. **2. Case analysis:** Students identify traces of early theoretical traditions in contemporary anthropological research. **3. Individual presentation/**	CLO 4 & 5: Synthesizes the entire course into a coherent narrative of disciplinary development. Connects historical theories to contemporary anthropological practice (fieldwork methodology, ethical

Course Code: 8224053	**Marks:** 100	**Credits:** 4	**Class Hours:** 56
Course Title: Research Methodology – I (RM-I)		**Course Type:** Core	**Exam Hours:** 4

Course Description

This is a course primarily to introduce the term "research" in its basic technical form meant for undergraduate level students. It has touched upon, in the process, all the important concepts, tools, and methods in use in the realm of social sciences research at large.

Course Objectives

To familiarize students with the idea of research and its various methodologies while teaching them about the indispensability of research for the production and transmission of objective knowledge in anthropology as well as in other academic disciplines.

Course Learning Outcomes (CLOs)

CLO Code	CLO Statement	Course Content Covered	BNQF Domain	Bloom's Level	Mapped PLO(s)
RM-CLO1	Define and differentiate key concepts in research methodology including research method, methodology, and the distinctive features of anthropological research.	Content 1	Fundamental	Remember	PLO1
RM-CLO2	Distinguish between different types of research (quantitative, qualitative, exploratory, explanatory, action, evaluative, comparative, academic, applied, and ethnographic) based on their main features and purposes.	Content 2	Fundamental	Understand	PLO1
RM-CLO3	Explain the range of data collection tools used in anthropological research including census, survey, participant observation, case study, life history, key informant interview, local history, oral history, group discussion, and mapping.	Content 3	Fundamental	Understand	PLO1, PLO2

PROVISIONAL

CLO Code	CLO Statement	Course Content Covered	BNQF Domain	Bloom's Level	Mapped PLO(s)
RM-CLO4	Analyze the issues in participant observation including extent of participation, participant vs. partisan observation, ethical and political issues, and role conflicts.	Content 4	Thinking	Analyze	PLO4, PLO7
RM-CLO5	Apply techniques for preparing questionnaires, transferring data from questionnaires to master sheets, compiling and presenting qualitative data, and organizing and managing field notes.	Content 5	Fundamental	Apply	PLO2
RM-CLO6	Explain the role and application of statistics in anthropological research.	Content 6	Fundamental	Understand	PLO1
RM-CLO7	Construct frequency distributions, frequency tables, and graphical presentations of data for effective summarization and visualization.	Content 7	Thinking	Apply	PLO2
RM-CLO8	Calculate and interpret measures of central tendency (mean, median, mode), measures of dispersion (range, variance, mean deviation, standard deviation, coefficient of variation), and measures of association (correlation and regression).	Content 8	Thinking	Apply	PLO2, PLO3
RM-CLO9	Critically reflect on fieldwork experiences and discuss the field experiences of different anthropologists.	Content 5	Thinking	Evaluate	PLO4, PLO8

PROVISIONAL

CLO Code	CLO Statement	Course Content Covered	BNQF Domain	Bloom's Level	Mapped PLO(s)
RM-CLO10	Design a basic research proposal incorporating appropriate methodology, data collection techniques, and ethical considerations for anthropological research.	Contents 1-5	Thinking/Personal	Create	PLO5, PLO7

Course Contents

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
Week 1,2	**Unit 1: Research:** Method, methodology and anthropological research.	Students are given a set of statements and must classify each as either method (specific technique), methodology (philosophical framework), or anthropological research (disciplinary application). They defend their classifications in small groups.	**1. Short concept quiz and classification exercise:** to assess understanding of key terms and distinctions. **2. Short analytical response:** explaining how epistemological assumptions influence anthropological research.	CLO 1: Defines and differentiates between research method, methodology, and anthropological research. Identifies the epistemological foundations that distinguish anthropological inquiry from other social sciences.
2. Week 3,4,5,6	**Unit 2: Main features & differences:** Quantitative and qualitative, exploratory, explanatory (descriptive/analytical), action, evaluative, comparative, academic, applied, and ethnographic research.	Students are given 10 different research scenarios/questions. They must match each to the most appropriate research type (e.g., "measuring poverty levels" → Quantitative; "understanding ritual meaning" → Ethnographic).	**1. Comparative worksheet:** identifying differences in questions, data, methods, and interpretation. **2. Scenario classification exercise:** with brief justification for each classification. **3. Case-analysis task:** requiring students to identify	CLO 1 & 2: Differentiates all major research types by their features, purposes, and appropriate contexts. Identifies when to apply each type and recognizes the complementar

PROVISIONAL

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
		They justify their choices and discuss overlaps.	research type, purpose and appropriate application. **4. Mini research proposal:** containin g research question, objectives, research type and methodological justification.	y relationship between quantitative and qualitative approaches.
3. Week 7,8,9, 10,11	**Unit 3: Data collection tools:** Quantitative (Census, survey) and qualitative (participant observation, case study, collection of life history, key informant interview (KII), local history, oral history, group discussion, mapping).	Students are divided into groups and assigned a research question (e.g., "studying migration patterns," "understanding indigenous land rights"). Each group selects 3-4 appropriate tools, justifies their selection, and role-plays a short data collection session using one tool.	**1. Tool-identification and critique exercise:** assessing purpose, strengths and limitations of selected tools. **2. Observation practical:** Students conduct a brief observation and submit structured field notes. **3. Interview practical:** Students conduct a short mock KII/life-history interview and submit the interview guide. **4. Practical exercise:** involving a short group discussion/oral-history activity and reflection on the method used. **5. Group research-design presentation:** justifying the selection and combination of 3–4 data collection tools.	CLO 3: Identifies and describes the purpose, strengths, and limitations of each data collection tool. Selects appropriate tools for specific research contexts and demonstrates basic proficiency in applying them.

PROVISIONAL

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
4. Week 12,13,14	**Unit 4: Issues in participant observation:** Extent of participation; participant or partisan observation, ethical and political issues, role conflicts.	Students read real-world ethnographic accounts of role conflicts (e.g., becoming too involved, witnessing illegal activities, and political pressures). They analyze each case, identify the ethical issue, and propose resolutions using anthropological codes of ethics.	**1. Positioning exercise:** Students justify an appropriate level of participation for a given field situation. **2. Case analysis:** Students identify role conflicts and propose appropriate strategies for managing them. **3. Ethical dilemma exercise:** Students propose and justify responses to selected fieldwork dilemmas.	CLO 4: Critically analyzes the ethical and political challenges inherent in participant observation. Evaluates the continuum from complete observer to complete participant and identifies strategies for managing role conflicts.
5. Week 15,16,17, 18,19	**Unit 5: Preparation of questionnaires:** transferring data from questionnaires to master sheets; compilation and presentation of qualitative data, reflections on fieldwork, discussion on field experiences of different anthropologists, organization and management of field notes.	Students design a short questionnaire on a chosen topic, administer it to peers, transfer data to master sheets, compile qualitative responses, and organize field notes. They then write a reflective fieldnote entry discussing their experience.	**1. Questionnaire design task:** Students prepare a short questionnaire and receive peer feedback. **2. Pilot-test report:** identifying ambiguity, response problems, bias and necessary revisions. **3. Data-management practical:** Students correctly code, enter, organize and verify questionnaire data. **4. Qualitative data compilation task:** requiring coding, categorization and concise presentation of responses. **5. Reflective field-note portfolio:** Students submit organized field notes and a	Demonstrates practical competence in questionnaire design, data compilation, and presentation. Develops reflective skills by analyzing anthropologists ' field experiences and organizing field notes systematically.

PROVISIONAL

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
			short reflection on their fieldwork experience.	
6. Week 20,21	**Unit 6: Statistics in Anthropology:** role and scope of statistics.	Students engage in a structured debate on the value and limitations of statistics in anthropological research. They read contrasting views and discuss when statistical tools are appropriate and when they obscure human meaning.	**1. Short debate/ reflection:** Students explain when statistical approaches are appropriate and when qualitative interpretation is more suitable. **2. Statistical decision-making exercise:** Students match research questions and variables with appropriate statistical procedures.	CLO 2 & 6: Understands the role of statistics as a supporting tool rather than the core of anthropological inquiry. Differentiates between contexts where statistical analysis is essential versus those where qualitative interpretation is paramount.
7. Week 22,23,24	**Unit 7: Data summarization and presentation:** Frequency distribution and frequency table, tabulation and graphic presentation of data.	Students are given raw datasets (e.g., age, income, household size). They manually construct frequency distributions, frequency tables, and various graphs (bar charts, histograms, pie charts, frequency polygons). They then interpret the visual patterns.	**1. Individual practical exercise:** constructing and interpreting frequency distributions and frequency tables. **2. Data-visualization assignment:** Students produce appropriate graphs and provide brief interpretations. **3. Interpretation exercise:** Students analyze tables/graphs and communicate the main findings in concise anthropological terms.	CLO 6 & 7: Demonstrates competence in organizing raw data into frequency distributions and tables. Constructs appropriate graphs and interprets visual data presentations to identify patterns and trends.

PROVISIONAL

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
8. Week 25,26, 27,28	**Unit 8: Data and its interpretations:** Measures of Central Tendency (mean, median, mode), measures of dispersion (range, variance, mean deviation, standard deviation, coefficient of variation), and measures of association (correlation and regression).	Students are given anthropological datasets (e.g., household income, fertility rates, and land ownership). They manually compute mean, median, mode, range, variance, standard deviation, and correlation coefficients. They then interpret what these measures reveal about the population.	**1. Short statistical practical:** Students calculate and interpret mean, median and mode. **2. Statistical problem set:** Students calculate measures of dispersion and explain their substantive meaning. **3. Applied statistics exercise:** Students calculate/ interpret correlation and basic regression results and distinguish association from causation. **4. Summative mini research portfolio/ presentation:** Students present a coherent research design incorporating methods, ethics, data management and appropriate qualitative/quantitative analysis.	CLO 6 & 7: Calculates and interprets measures of central tendency, dispersion, and association. Applies statistical tools to anthropological data and interprets results in meaningful social/cultural terms.

Course Code: 8224055	**Marks:** 100	**Credits:** 4	**Class Hours:** 56
Course Title: Economic Anthropology (EA)		**Course Type:** Core	**Exam Hours:** 4

Course Description

This course introduces the study of man and his socio-cultural disposition through the lens of economy. Its content consists of intellectual landmarks related to a wide range of topics between the relevance and significance of this particular area and theories and ethnographies on commodity, exchange, money, and market.

Course Objectives

To generate a historically embedded understanding of economy that is both cross-cultural and human-centered in nature. To develop a critical sense on the nature of money and market and the way these two define modern man and his understanding of the world.

Course Learning Outcomes (CLOs)

PROVISIONAL

Course Contents

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
1. Week 1,2	**Unit 1: Introduction to economic anthropology:** Definition, nature, scope, and its contemporaneity.	Students begin by defining "economy" and "culture" separately, and then merge them to construct their own definition of economic anthropology. They compare their definitions with canonical ones and discuss why the field remains relevant today (e.g., global capitalism, inequality, climate change).	**1. Concept quiz and definition exercise:** Students define economic anthropology and identify its distinctive focus. **2. Short analytical response:** Students explain how an anthropological perspective contributes to understanding a contemporary economic issue.	CLO 1: Defines economic anthropology, identifies its nature and scope, and explains its contemporary relevance in understanding global economic phenomena.
2. Week 3,4,5,6	**Unit 2: Development of economic anthropology as a field of knowledge.**	Students construct a chronological timeline tracing the evolution of economic anthropology from early ethnographic accounts of "primitive" economies (Malinowski's *Trobriand Islanders*, Mauss's *The Gift*) to its establishment as a distinct sub-discipline. They identify key turning points and shifts in focus.	**1. Reading response:** Students identify how early ethnographic accounts challenged assumptions about non-Western economies. **2. Annotated timeline:** Students identify major thinkers, concepts and turning points in the development of the field. **3. Contextual analysis:** Students relate a major theoretical development to its historical and political-economic context. **4. Short comparative essay:** Students explain	CLO 1 & 2: Traces the historical development of economic anthropology and identifies how changing global contexts (colonialism, post-colonialism, neoliberalism) shaped its intellectual trajectory.

PROVISIONAL

			how the concerns of economic anthropology changed from early ethnography to contemporary global capitalism.	
3. Week 7,8,9, 10,11	**Unit 3: Theoretical issues in economic anthropology:** Formalist (Herskovits, Firth, Goodfellow) and Substantivist (Polanyi, Malinowski, and Dalton) debate.	The class is divided into Formalist and Substantivist teams. A case study (e.g., "Is a peasant market rational?") is presented. Formalists argue using universal economic principles (maximization, scarcity), while Substantivalists argue using embeddedness, social relations, and institutional contexts. A final round critiques each position.	**1. Concept comparison exercise:** Students identify and explain the principal assumptions of both schools. **2. Case-analysis task:** Students use Formalist principles to explain economic behavior in a selected ethnographic situation. **3. Case-analysis task:** Students explain an economic activity using Substantivist concepts of embeddedness and institutional context. **4. Debate assessment and individual reflection:** Students use evidence, theoretical concepts and counterarguments to defend and critique both positions. **5. Comparative critical essay:** Students evaluate the contributions and limitations of both approaches and formulate a reasoned synthesis.	CLO 2, 3 & 4: Analyzes the core assumptions of both schools. Evaluates the strengths and weaknesses of each position. Synthesizes how the debate shaped the field and recognizes its unresolved nature in contemporary economic anthropology.

PROVISIONAL

4. Week 12,13,14, 15,16	**Unit 4: Marxist anthropology** (Godelier, Meillassoux, Rey, and Terray).	Students read a brief ethnographic case (e.g., a lineage-based society, a capitalist factory). They apply the Marxist concepts of mode of production, relations of production, and surplus extraction (as developed by Godelier, Meillassoux, etc.) to analyze social organization, inequality, and change.	**1. Concept application exercise:** Students apply Marxist concepts to a simple ethnographic or workplace case. **2. Comparative theorist matrix:** Students compare the major theorists in terms of concepts, analytical focus and contributions. **3. Case-analysis assignment:** Students explain how economic organization influences social structure and inequality. **4. Critical response paper:** Students evaluate Marxist anthropology's contribution to explaining power, exploitation and social change. **5. Comparative synthesis exercise:** Students explain how Marxist anthropology challenged or extended Formalist and Substantivist perspectives.	CLO 2, 3 & 4: Identifies the Marxist critique of both Formalism and Substantivism. Analyzes how modes of production shape social structures. Evaluates the contribution of Marxist anthropology to understanding power, exploitation, and historical transformation.
5. Week 17,18,19, 20	**Unit 5: Commodity and Exchange:** Process of commoditization in world economy,	Students select a common consumer good (e.g., a smartphone, coffee, a t-shirt). They trace its entire commodity	**1. Commodity-chain mapping:** Students identify stages of production, distribution and consumption and the actors involved.	CLO 3, 4 & 5: Applies the concept of commodity fetishism to real-world products. Analyzes the process of

PROVISIONAL

	commodity fetishism.	chain from raw material extraction to production, distribution, and consumption. They identify points where social relations are obscured (commodity fetishism) and discuss commoditization's social and environmental impacts.	**2. Critical case analysis:** Students identify manifestations of commodity fetishism in a selected consumer product. **3. Group presentation:** Students evaluate the social, cultural, economic and environmental consequences of commoditization. **4. Individual analytical essay:** Students construct an evidence-based argument about how commoditization transforms social relationships.	commoditizatio n and its social consequences. Critically evaluates how global capitalism transforms things and relationships into commodities.
6. Week 21,22,23	**Unit 6: Spheres of Exchange:** Reciprocity, redistribution, and market exchange.	Students create a matrix comparing reciprocity (generalized, balanced, negative), redistribution, and market exchange across criteria: basis of obligation, material outcome, social function, and contemporary examples. They then role-play a village setting where they must allocate resources using each sphere.	**1. Classification exercise:** Students classify exchange situations and justify the type of reciprocity involved. **2. Comparative matrix and simulation reflection:** Students compare obligation, material outcome and social function across exchange systems. **3. Short case analysis:** Students explain how multiple exchange systems operate simultaneously and may complement or conflict with one another.	CLO 3 & 4: Differentiates and classifies the three spheres of exchange. Applies each concept to ethnographic and contemporary contexts. Analyzes how different exchange systems integrate or conflict within the same society.

PROVISIONAL

7. Week 24,25,26	**Unit 7: Money and Market:** Forms, functions, and evolution of money; features and functions of market; growth and development of market relations, market society, and market culture.	Students observe a local market (physical or digital) and document: (1) forms of money used, (2) non-monetary exchanges observed, (3) social relationships embedded in transactions, and (4) how the market shapes local culture. They write a reflective essay connecting observations to theoretical concepts.	**1. Market observation report:** Students identify forms/functions of money and describe social relationships embedded in transactions. **2. Analytical field report:** Students analyze how market relations influence social relationships and cultural practices. **3. Critical response:** Students evaluate Polanyi's argument using contemporary examples of market relations.	CLO 1, 4 & 5: Identifies diverse forms and functions of money beyond its narrow economic definition. Analyzes markets as social and cultural institutions, not just economic spaces. Critically evaluates Polanyi's argument about the "disembedding" of markets and the rise of "market society."
8. Week 27,28	**Unit 8: Consumption:** Unit of consumption, consumption network.	Students map their own or a family's consumption network, identifying: (1) the unit of consumption (individual, household, community), (2) key actors and relationships, (3) cultural meanings attached to goods, and (4) how consumption connects to identity, status, and social reproduction.	**1. Consumption-network map and explanatory note:** Students identify the unit of consumption and analyze relationships within the network. **2. Summative integrative project/ presentation:** Students use an anthropological framework to analyze a contemporary economic practice from production/exchange through consumption.	CLO 4 & 5: Analyzes consumption as a socially and culturally embedded practice. Differentiates the unit of consumption and maps consumption networks. Evaluates how consumption reflects and reproduces social structures, identities, and cultural values.

Course Code: 8224057	**Marks:** 100	**Credits**: 4	**Class Hours**: 56
Course Title: European Social History and Culture (ESHC)		**Course Type:** Core	**Exam Hours:** 4

Course Description

This is an introductory course meant for the students who are slowly entering into the realm of a modern academic discipline that was once essentially European, colonial, and racial. In this course student will come across historical and ethnographic materials on European society and culture ranging from Renaissance through Enlightenment and the Age of Revolution to the mid-nineteenth century to end with.

Course Objectives

To know the history of the socio-cultural origin of a discipline that they study while learning about epoch making events that leave deep impression on future man and society as well as on his knowledge base and knowledge making processes.

Course Learning Outcomes (CLOs)

CLO Code	CLO Statement	Course Content Covered	BNQF Domain	Bloom's Level	Mapped PLO(s)
ESHC-CLO1	Recall the key features of the Renaissance and the Reformation, including their intellectual and social transformations.	Content 1	Fundamental	Remember	PLO1
ESHC-CLO2	Explain European expansion through geographical discoveries and analyze the resulting economic and social transformations including the expansion of agriculture, trade, industry, and growth of capitalism.	Content 2	Fundamental	Understand	PLO1, PLO9
ESHC-CLO3	Analyze seventeenth-century decline and renewal, including traditional and popular culture, reform of traditional culture, and the phenomenon of witchcraft and witch craze.	Content 3	Thinking	Analyze	PLO3

Course Contents

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
Week 1,2	**Unit 1: The Renaissance and the Reformation**	Students compare medieval worldview (theocentric, feudal, scholastic) with Renaissance humanism (anthropocentric, classical revival, secularism) and Reformation principles (individual conscience, scriptural authority). They identify how these ruptures laid the foundation for modern social thought.	**1. Concept quiz and comparison chart:** Students identify major characteristics and explain differences between medieval and Renaissance worldviews. **2. Source-analysis exercise:** Students analyze selected texts and explain how Renaissance and Reformation ideas challenged established authority.	CLO 1 & 2: Identifies the core intellectual and cultural shifts of the Renaissance and Reformation. Analyzes how these movements challenged established authorities and created space for new ways of thinking about humanity, society, and governance.

PROVISIONAL

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
Week 3,4,5,6	**Unit 2: European expansion:** Geographical discoveries, economic and social transformation, expansion of agriculture, trade and industry, growth of capitalism.	Students are given a world map and timeline. They plot key geographical discoveries, trade routes, and colonial possessions. They then trace how these discoveries brought new wealth, transformed agriculture (enclosure movements), stimulated industry, and fueled the rise of early capitalism. They discuss the human consequences (slavery, colonization).	**1. Annotated map/timeline:** Students identify major discoveries and explain their relationship to European expansion. **2. Short case analysis:** Students explain how agricultural transformation affected rural populations, labor and social organization. **3. Causal concept map:** Students demonstrate relationships among expansion, trade, industry and early capitalism. **4. Critical reflection/ short essay:** Students evaluate the consequences of European expansion for European and colonized societies.	CLO 2 & 3: Analyzes the interconnectedness of geographical expansion, economic transformation, and social change. Evaluates how European expansion reshaped both Europe and the colonized world, creating the material conditions for modern capitalism.
Week 7,8,9	**Unit 3: Seventeenth century decline and renewal:** Traditional and popular culture, reform of traditional culture, witchcraft and witch craze.	Students read primary and secondary sources on the European witch craze (c. 1560-1660). They analyze the phenomenon through multiple lenses: religious conflict, gender politics, economic anxiety, and state-building. They discuss how the "decline" of traditional culture and the	**1. Source-analysis task:** Students identify differences between elite and popular cultural forms and explain processes of cultural change. **2. Multi-perspective case analysis:** Students explain the witch craze using at least three analytical perspectives.	CLO 2 & 4: Analyzes the witch craze as a symptom of broader socio-economic and religious transformations. Critically evaluates how the persecution of "popular culture" reflected elite anxieties and the

PROVISIONAL

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
		"renewal" of rationalist culture intersected.	**3. Critical response:** Students evaluate how the suppression of popular practices reflected changing forms of authority.	consolidation of new forms of authority (state, church, science).
Week 10,11, 12,13	**Unit 4: The Age of Enlightenment:** Reason and reform (the science of religion), Christianity under attack (skeptics, free thinkers and philosophers), the formation of secular culture—salons, Freemasons, scientific academies.	Students role-play an 18th-century Parisian salon gathering. Each student represents a key Enlightenment thinker (Voltaire, Diderot, Rousseau, etc.) and presents their critique of religion and vision for a rational society. The "salon" debates the limits of reason, the role of religion, and the nature of progress.	**1. Concept-map assessment:** Students explain the central principles and intellectual foundations of the Enlightenment. **2. Textual analysis:** Students compare different critiques of religion and explain their implications for secular culture. **3. Role-play and individual reflection:** Students present an Enlightenment position and critically reflect on the limits and possibilities of reason. **4. Critical analytical essay:** Students evaluate both contributions and contradictions of Enlightenment thought.	CLO 1, 2 & 4: Identifies the core principles of the Enlightenment (reason, progress, secularism). Analyzes how Enlightenment thinkers challenged religious authority and built new secular institutions. Evaluates the Enlightenment's strengths (liberty, science) and contradictions (colonialism, exclusion of women).
Week 14,15, 16,17	**Unit 5: Political thoughts** (of Locke, Voltaire, Rousseau, and Montesquieu) **and social thoughts** (on	Students complete a matrix comparing Locke, Voltaire, Rousseau, and Montesquieu across key themes: human nature, social contract, state of nature, ideal government, liberty, and property. They	**1. Comparative matrix:** Students accurately differentiate the political ideas of the four thinkers. **2. Short analytical response:** Students explain how Enlightenment ideas	CLO 1, 3 & 4: Differentiates and compares the political philosophies of key Enlightenment thinkers. Analyzes how their ideas on epistemology, education,

PROVISIONAL

	epistemology, education, humanitarianism, and economy).	then write a short essay imagining a debate between these thinkers on a contemporary issue (e.g., democracy, inequality, religious freedom).	about knowledge and education challenged traditional institutions. **3. Case-analysis exercise:** Students relate Enlightenment ideas to emerging modern social and economic institutions. **4. Debate and individual synthesis:** Students compare competing arguments and construct an evidence-based conclusion.	humanitarianism, and economy shaped modern social institutions. Evaluates the lasting influence and limitations of their thought.
Week 18,19, 20,21	**Unit 6: The Age of Revolution** (American War of Independence, French Revolution, the Industrial Revolution).	Students are divided into three expert groups (American, French, and Industrial Revolutions). Each group analyzes their revolution's: (1) causes, (2) key events, (3) social groups involved, (4) ideological foundations, and (5) consequences. Groups then present and discuss commonalities and differences.	**1. Revolution case brief:** Students explain the major causes and consequences of the American Revolution. **2. Historical source analysis:** Students evaluate the relationship between social structure, political ideas and revolutionary change. **3. Cause-and-consequence analysis:** Students explain how industrialization transformed economic and social organization. **4. Comparative presentation and synthesis matrix:** Students compare the three revolutions and	CLO 2, 3 & 4: Analyzes the interconnected causes and consequences of the three revolutions. Evaluates how these revolutions radically transformed political authority, social hierarchy, economic organization, and intellectual frameworks. Synthesizes their combined impact on modern social thought.

PROVISIONAL

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
			identify their combined significance.	
Week 22,23,24	**Unit 7: The Early 19th Century's social thought**: Romanticism ; German Idealism, Empiricism and Conservatism , Liberalism and Radicalism, Democracy and Socialism.	Students create a visual mind map positioning Romanticism, German Idealism, Empiricism, Conservatism, Liberalism, Radicalism, Democracy, and Socialism as responses to the Enlightenment and Revolutions. They connect each current to key thinkers and trace how they influenced one another. CLO 1, 2 & 3: Identifies and differentiates the major intellectual currents of the early 19th century. Analyzes each as a reaction to the Enlightenment and the Revolutions. Evaluates the strengths and limitations of each tradition in addressing inequality, authority, and social change.	**1. Mind map and short explanation:** Students identify and differentiate major intellectual currents and their key concerns. **2. Comparative analysis:** Students explain similarities and differences among the traditions and their responses to revolutionary change. **3. Critical position paper:** Students evaluate how democracy and socialism addressed problems of inequality and authority.	CLO 1, 2 & 3: Identifies and differentiates the major intellectual currents of the early 19th century. Analyzes each as a reaction to the Enlightenment and the Revolutions. Evaluates the strengths and limitations of each tradition in addressing inequality, authority, and social change.
Week 25,26, 27,28	**Unit 8: Social thoughts of mid-nineteenth century**	Students read excerpts from mid-19th century social thinkers (Comte, Marx, Spencer, Mill, Tocqueville). They discuss how these thinkers grappled with industrialization, democracy, and social order. They then trace connections to the emergence of early anthropological theory	**1. Theorist comparison exercise:** Students compare central concepts and intellectual contributions. **2. Comparative source analysis:** Students analyze how different thinkers interpreted industrialization,	CLO 3, 4 & 5: Synthesizes the key themes of mid-19th century social thought. Evaluates how these thinkers provided the intellectual foundations for early anthropology and sociology. Connects historical social thought to the development of

PROVISIONAL

Week	Topic	Teaching-Learning Strategy	Assessment Strategy	Alignment to CLOs
		(Evolutionism, Functionalism, etc.).	democracy and social inequality. **3. Theory genealogy assignment:** Students construct and explain intellectual links between nineteenth-century social thought and early anthropology. **4. Summative integrative assessment:** Students produce a synthesis essay/ presentation explaining how major historical and intellectual transformations contributed to the emergence of modern social science and anthropology.	the social sciences as academic disciplines.

Course Code: 8222059	**Marks:** 100	**Credits:** 4	**Class Hours:** 56
Course Title: Sociology of Bangladesh		**Course Type:** Core	**Exam Hours:** 4

Course Descriptions

This course introduces Political Science Honours students to the sociological study of Bangladeshi society, examining its structure, institutions, and the social forces that shape everyday life. It covers the family, kinship, and stratification systems that organize rural and urban communities; the enduring role of religion in social life; and the changing position of women within a patriarchal but rapidly modernizing society. The course also confronts pressing social problems — poverty, dowry, child marriage, and substance abuse — and the processes of social change driven by NGOs, globalization, and development policy. By grounding sociological concepts in the Bangladeshi context, the course equips students to read political events and public policy as embedded within a living social fabric, not apart from it.

Course Objectives

This course is designed to introduce students to the major features of Bangladeshi society and its changing social, cultural, economic and political Condition. It aims to help students understand the relationship between different social institutions and contemporary social issues. The course also encourages students to develop an interest in familiarity with the realities of Bangladeshi society and to relate sociological ideas to everyday life and national development.

Course Learning Outcomes (CLOs) Should follow the

After going through the course, students will be able to learn the following outcomes:

CLO1: Appreciate the importance of cultural diversity and ethnic coexistence in Bangladesh.

CLO2: Analyze several changing social issues of Bangladesh from sociological perspective.

CLO3: Explain the basic concepts, institutions and characteristics of society of Bangladesh.

CLO4: Apply fundamental sociological theories to be informed about social problems in Bangladesh.

CLO5: Illustrate the historical evolution, social background, family system, not only economy but also political system of Bangladesh.

CLO6: Collaborate with peers sociological ideas effectively for Bangladeshi society.

Course Code: 8222259	**Marks:** 100	**Credits:** 4	**Class Hours:** 56
Course Title: Bangladesh Economy		**Course Type:** Core	**Exam Hours:** 4

Course Descriptions

This course introduces Political Science Honours students to the structure, performance, and policy management of the Bangladesh economy, with emphasis on how economic decisions are shaped by, and in turn shape, political and administrative processes. It begins with an overview of macroeconomic trends in growth, savings, and investment before moving into the fiscal, monetary, and external sectors that underpin national economic management. Particular attention is given to the agriculture and industrial sectors, the role of state-owned enterprises, and the ongoing shift toward private sector-led development. The course also examines employment, wages, and poverty trends alongside government efforts in human development and social protection, and closes with a look at infrastructure, environmental challenges, and Bangladesh's climate vulnerability. Rather than treating economics as a technical subject in isolation, the course consistently draws out its political dimensions: budget-making as a political act, regulatory reform as a contest of interests, and development planning as a reflection of governance priorities. By the end, students should be able to follow Bangladesh's economic policy debates with confidence and understand economic performance as part of the larger picture of governance.

Course Objective

- Build a working understanding of Bangladesh's macroeconomic structure, growth performance, and the institutional framework within which economic policy is formulated and implemented.
- Examine the role and performance of the agriculture, industrial, and external sectors in Bangladesh's development, along with the government policies that shape them.
- Assess the fiscal and monetary management practices of Bangladesh, including public revenue and expenditure, taxation, budgetary management, banking, and financial sector reforms.
- Analyze trends in employment, wages, prices, and poverty in Bangladesh, and evaluate the effectiveness of government programs addressing these areas.
- Develop the ability to critically connect Bangladesh's economic performance with questions of governance, public policy, and political decision-making, so that economic issues can be read through a political science lens.

Course Learning Outcomes (CLOs)

Upon successful completion of the course, students will be able to:

CLO1: Demonstrate a clear and working understanding of Bangladesh's macroeconomic performance, national income, savings, and investment trends, and the institutional structure guiding economic policy.

CLO2: Analyze the contribution, performance, and challenges of the agriculture, industrial, and external (trade) sectors to Bangladesh's overall economic development.

CLO3: Evaluate the fiscal and monetary management systems of Bangladesh, including public finance, taxation, budgetary practices, banking, and financial sector reforms.

CLO4: Assess trends in employment, wages, prices, and poverty in Bangladesh, along with the design and effectiveness of related government programs.

PROVISIONAL

CLO5: Critically appraise the political economy dimensions of Bangladesh's development policy, linking economic outcomes with governance, planning, and public administration.

Guidelines of Viva-voce

Course Code: 8224060	**Marks: 50**	**Credits: 2**	**B. A. Honors 2nd Year**
Course Title: Viva-voce (Anthropology)		**Paper Orientation**: Practical	

Course Description

The Viva Voce is a comprehensive oral examination designed to evaluate students' overall academic achievement, subject knowledge, communication skills, and professional readiness acquired during the anthropology program. Conducted after the completion of written examinations, this course provides students with an opportunity to demonstrate their understanding of anthropological theories, research methodology, economic anthropology, European social history and culture, and related academic areas. The examination also assesses students' ability to explain anthropological concepts, analyze ethnographic works, apply research methods, discuss historical and cultural aspects, and communicate effectively in academic and professional settings.

Course Objectives

The objectives of the course are to:

- Evaluate students' knowledge of major areas of anthropological theory, research methods, economic anthropology, and cultural history through oral examination.
- Assess students' ability to explain anthropological texts, concepts, theories, and ethnographic contributions.
- Develop effective oral communication, presentation skills, and confidence among students.
- Evaluate students' analytical thinking and ability to answer academic questions related to anthropological studies.
- Assess students' understanding of socio-cultural diversity, history, and human institutions.
- Prepare students for higher studies, research, community engagement, and professional opportunities related to anthropology and social sciences.

Course Learning Outcomes (CLOs)

After going through the viva voce, the students will be able to:

- **CLO 1:** Demonstrate comprehensive knowledge of anthropological theories, research methods, economic anthropology, and social history.
- **CLO 2:** Explain and analyze important anthropological concepts, texts, authors, and ethnographic contributions.
- **CLO 3:** Communicate academic ideas effectively and confidently through oral presentation.
- **CLO 4:** Analyze and respond critically to questions related to early anthropological theory, research methodology, economic systems, and cultural history.
- **CLO 5:** Demonstrate professional attitude, confidence, ethical values, and academic responsibility.
- **CLO 6:** Show readiness for higher education, research, teaching, and career development in anthropology-related fields.

CLO to PLO Mapping Matrix

The mapping of CLO to PLO is presented in the matrix below, identifying the level of correlation between course-specific competencies and professional graduate attributes.

CLO/PLO	PLO1	PLO2	PLO3	PLO4	PLO5	PLO6	PLO7	PLO8	PLO9
CLO1	H	M	H	M	M	M	-	M	-
CLO2	H	H	M	H	M	M	-	M	-
CLO3	M	M	H	M	M	H	M	M	-
CLO4	H	M	H	H	M	H	M	M	-
CLO5	M	M	M	H	H	M	H	M	-
CLO6	M	M	M	H	M	H	H	H	M

Note: *H = High Correlation; M = Medium Correlation; L = Low Correlation; (-) = No Correlation.*

Teaching System

The Viva-voce course follows an interactive and student-centered approach. Teaching and learning activities include orientation sessions, discussion sessions, question-answer sessions, mock viva examinations, review of important anthropology topics, individual guidance, and self-directed learning. Students are encouraged to develop analytical ability, communication skills, confidence, and presentation skills required for academic and professional environments.

Assessment Strategy

Students will be assessed through a comprehensive viva voce examination conducted by the designated Examination Committee after completion of written examinations. The assessment will evaluate students' overall understanding of anthropological theory, research methodology, economic anthropology, and social history. Students' ability to explain concepts, analyze texts, apply methodological knowledge, answer academic questions, communicate effectively, and demonstrate professional attitude and confidence will be considered. The final grade will be awarded based on the performance demonstrated during the viva voce examination.
